**COMMENTS:** Met with Mr. Bobby Masters on-site. Trucks were being loaded and the cement silo was being filled at the time of the inspection. No problems were noted other than a hole in the duct pipe coming from the truck drop point and leading to a dust collector was observed. Due to inadequate suction, visible emissions above 20% opacity was observed. Mr. Bobby Masters stated that this hole appeared the previous day and new ductwork had already been ordered. Repairs would be made as soon as possible. He stated that he would place a tarp around the hole in the meatime as a "band aid". No other fugitve dust concerns were observed. Mr. Masters said that the filters in the baghouse's are replaced yearly.
