

CONCRETE BATCHING PLANT

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE:	ANNUAL (INS1, INS2)	COMPLAINT/DISCOVERY	(CI)
	RE-INSPECTION (FUI)	ARMS COMPLAINT NO: _	
AIRS ID#: 7775310 001	DATE: _9/4/08	ARRIVE: 1:30 PM	DEPART: 2:30 PM
FACILITY NAME: Act	tion Concrete LLC		
FACILITY LOCATION	N: 6201 Seminole Boulevard		
	Seminole, FL		
RESPONSIBLE OFFIC	IAL: Richard K. Bailey?	PHONE: 72	27-391-6442
CONTACT NAME: Ri	chard K. Bailey?	PHONE: 72	27-391-6442
REMITTANCE YEAR:	N/A ENTITLE	MENT PERIOD: 1/8/2006 (effective date)	/ 1/8/11 (end date)
PART I: <u>INSPECTION</u>	COMPLIANCE STATUS (chec	ck ☑ only one box)	
⊠ IN COMPLIANO	CE MINOR Non-COMPLI	ANCE SIGNIFICANT N	on-COMPLIANCE
PART II: TESTING/RE (check ☑ appropriate	CORDKEEPING REQUIREM te box(es))	<u>ENTS</u> – Rule 62-296.414, F.A.C	•
	e our(es))		
	sions tests conducted during this s		
2. Are emissions from	m silos, weigh hoppers (batchers),	and other enclosed storage and co	onveying equipment
	extent necessary to limit visible emissions tests of the silo dust collec		
at a rate that is repundess such rate is	presentative of the normal silo load sunachievable in practice?	ling rate, or at least at the minimu	m 25 tons per hour rate, \bigsymbol{\text{X}}Yes \bigsymbol{\text{N}} No
4. Are emissions from	m the weigh hopper (batcher) open	ration controlled by the silo dust c	ollector? (If answer
skip 4.a) and 4.b)	"Yes", then continue on to question and continue on to question 5.)	·	
b) During the visi	ing operation in operation during the libe emissions test, was the batching	ng rate representative of the norma	al batching rate and
	the weigh hopper (batcher) operat		
from the silo dust	collector, are the visible emissions patching at a rate that is representate	s tests of the weigh hopper (batche	er) dust collector
Conducted willle t	acting at a rate that is represental	uve of the normal batching rate at	id duration: [] 1 es [] 100

PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. – (continued)	
(check \square appropriate box(es)	
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)	
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the	 _
annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	⊠Yes □ No
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)	
2. Did this facility demonstrate:	
	□Yes □ No
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form	
submittal date?	∐Yes ☐ No
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)	
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to	
	⊠Yes □ No
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)	
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the	
test was completed?	Yes □ No
	_
ART III. OPERATING/RECORDKEEPING REQUIREMENTS - Rule 62-210 300(4)(c)2. F.A.C.	
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))	
(check ☑ appropriate box(es))

PART III: OPERATING/RECORDKEEPING REQUIREME	ENTS – Rule 62-296.414(2)(a) and (b), F.A.C.	(continued)
(check ☑ appropriate box(es))		
<u>Unconfined</u> <u>Emissions</u> – (Rule 62-296.320(4)(c), F.A.C.)		
1. Does the owner /operator of the concrete batching plant tal	ke reasonable precautions to control unconfined	
emissions by:		
a) management of roads, parking areas, stock piles, and		
1) paving and maintenance of roads, parking areas, st		⊠Yes □ No
2) application of water or environmentally safe dust-s		
emissions?		· ⊠Yes ∐ No
3) removal of particulate matter from roads and other pa		
re-entrainment, and from building or work areas to		⊠Yes □ No
4) reduction of stock pile height, or installation of win		
particulate matter from stock piles?		
b) use of spray bar, chute, or partial enclosure to mitigate	e emissions at the drop point to the truck?	⊠Yes □ No
PART IV: SPECIAL CONDITIONS AND PROCEDURES -	Rule 62-210.300(4)(d)4., F.A.C.	
A. New or Modified Process Equipment		
1. Since the last inspection has there been		
a) installation of any new process equipment?		☐Yes ⊠ No
b) alterations to existing process equipment without re		
c) replacement of existing equipment substantially diff	ferent than that noted on the most	
recent notification form?		☐Yes ⊠ No
d) If you answered YES to any of the above, did the o	wner submit a new and complete	
notification form and appropriate fee (Rule 62-4.05)	0, FAC) to the appropriate DEP or	
local program office?		□Yes □ No

	M	S	
I	N	N	
N	C	C	B. Specific Conditions
			A facility using this air general permit may collocate with other facilities that separately registered for, and are also using, the concrete batching plant air general permit, and with facilities using the nonmetallic mineral processing plant air general permit at paragraph 62-210.310(5)(e), F.A.C., even if under the control of different persons, provided the following conditions are met. a. The collocation site does not contain any emissions units and pollutant-emitting activities other than concrete batching plants using air general permits, nonmetallic mineral processing plants using air general permits, and nonmetallic mineral processing plants or other emissions units and pollutant-emitting activities exempted from permitting pursuant to subsection 62- 210.300(3), F.A.C., or Rule 62-4.040, F.A.C. b. The total fuel consumption by all emissions units at the collocation site shall not exceed 275,000 gallons of diesel fuel, 23,000 gallons per year of gasoline, 44 million standard cubic feet per year of natural gas, or 1.3 million gallons per year of propane, or an equivalent prorated amount if multiple fuels are used. c. If multiple fuels are used, the equivalent prorated amount of each fuel burned shall not exceed the total amount of such fuel allowed to be burned, as given in sub-subparagraph b., multiplied by a fuel percentage. The fuel percentage is the percentage ratio of the amount of the fuel burned at the facility to the total amount of such fuel allowed to be burned at the facility pursuant to subparagraph b. The sum of the fuel percentages for all fuels burned by the facility shall not exceed one hundred percent (100%). d. The owners or operators of all collocated concrete batching plants and nonmetallic mineral processing plants shall maintain records to account for site-wide fuel consumption for each calendar month and each consecutive twelve (12) months. The owners or operators shall retain these records, available for Department inspection, for a period of at least five (5) years. [62-210.3
			Unconfined Emissions. The owner or operator shall take reasonable precautions to control unconfined emissions from hoppers, storage and conveying equipment, conveyor drop points, truck loading and unloading, roads, parking areas, stock piles, and yards as required by Rule 62-296.320(4)(c), F.A.C. For concrete batching plants the following shall constitute reasonable precautions: (a) Management of roads, parking areas, stock piles, and yards, which shall include one or more of the following: 1. Paving and maintenance of roads, parking areas, and yards. 2. Application of water or environmentally safe dust- suppressant chemicals when necessary to control emissions. 3. Removal of particulate matter from roads and other paved areas under control of the owner or operator to mitigate re-entrainment, and from building or work areas to reduce airborne particulate matter. 4. Reduction of stock pile height or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles. (b) Use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck. [62-296.414(2)] Comments: The yard was wet; there were no unconfined emissions, from site activity at the time of the inspection.
			Visible emissions tests of silo dust collector exhaust points shall be conducted while loading the silo at a rate that is representative of the normal silo loading rate. The minimum loading rate shall be 25 tons per hour unless such rate is unachievable in practice. If emissions from the weigh hopper (batcher) operation are also controlled by the silo dust collector, the batching operation shall be in operation during the visible emissions test. The batching rate during the emissions test shall be representative of the normal batching rate and duration. Each test report shall state the actual silo loading rate during emissions testing and, if applicable, whether or not batching occurred during emissions testing. [62-296.414(3)(c), F.A.C.] Comments: The last test, on 11/15/07, was conducted at a process rate of 25 tph. Based on that test, the facility process rate was limited to 25 tph.

	M	S	
Ι	N	N	
N	C	C	B. Specific Conditions
			If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which is separate from the silo dust collector, visible emissions tests of the weigh hopper (batcher) dust collector exhaust point shall be conducted while batching at a rate that is representative of the normal batching rate and duration. Each test report shall state the actual batching rate during emissions testing. [62-296.414(3)(d), F.A.C.]
			Comments: Emission from the weigh hopper are not controlled by a separate dust collector.
			Frequency of Testing. 1. The owner or operator of any concrete batching plant using an air general permit shall have a performance test conducted for visible emissions no later than thirty (30) days after the unit commences operation, and annually thereafter. 2. The owner or operator of any concrete batching plant operating under the authority of an air construction permit or air operation permit shall have a performance test conducted for visible emissions for each dust collector exhaust point prior to submitting the application for an initial air operation permit, and annually thereafter. [62-296.414(4), F.A.C.] Comments: The test is required to be completed annually. The last test was conducted on 11/15/07, and the test
			results were submitted on 11/27/08.
			Test Reports The required test report shall be filed with the PCDEM as soon as practical but no later than 45 days after the test is completed. [Rules 62-213.440 and 62-297.310(8)(b), F.A.C.]
			Comments: The last test was conducted on 11/15/07, and the test results were submitted on 11/27/08.
\boxtimes			 The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to: Operating parameters of the pollution control device; Time table for the routine maintenance of the pollution control device as specified by the manufacturer; Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation; A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant; A record log which will indicate, at a minimum: When maintenance and observations were performed; What maintenance and observations were performed; and Who performed said maintenance and observations. Acceptable parameter ranges for each operational check. [Pinellas County Code, Subsection 58-128] Comments: Reviewed records for the months of 7/30/07 through 9/4/08 indicated emission unit in compliance.
			C. General Procedure Requirements and Conditions
			Administrative Corrections. Within thirty (30) days of any minor changes requiring corrections to information contained in the registration form, the owner or operator shall notify the Department in writing. Such changes shall include: 1. Any change in the name, address, or phone number of the facility or authorized representative not associated with a change in ownership or with a physical relocation of the facility or any emissions units or operations comprising the facility; or 2. Any other similar minor administrative change at the facility. 62-210.310(2)(d), F.A.C.] Comments: Not applicable at this time.

			Equipment Changes. The owner or operator shall maintain records of all equipment changes. In the case of installation of new process or air pollution control equipment, alteration of existing process or control equipment without replacement, or replacement of existing process or control equipment with equipment substantially different in terms of capacity, method of operation, material processed, or intended use than that noted on the most recent registration form, the owner or operator shall submit a new and complete air general permit registration form for the facility with the appropriate fee pursuant to Rule 62-4.050, F.A.C. to the Department, provided, however, that any change that would constitute a new major stationary source, major modification, or modification that would be a major modification but for the provisions of paragraph 62-212.400(2)(a), F.A.C., shall require authorization by air construction permit. 62-210.310(2)(e), F.A.C.] **Comments: Not applicable at this time.**
			The owner or operator's use of an air general permit is limited to five (5) years. Prior to the end of the five (5) year term, the owner or operator who intends to continue using the air general permit for the facility shall re-register with the Department pursuant to subparagraph 62-210.310(2)(b)2., F.A.C. To avoid lapse of authority to operate, the owner or operator must submit the proper registration form and processing fee at least thirty (30) days prior to expiration of the facility's existing air general permit. The air general permit re-registration form shall contain all current information regarding the facility. [General Conditions - 62-210.310(3)(a), F.A.C.] Comments: The permit expires on 1/8/11. A new notification form is required to be submitted no later than 12/9/10.
