Administrative Changes:  1. Were there any change in the name, address, or phone number of the facility or authorized representative not associated with a change in ownership or with a physical relocation of the facility or any emissions units or operations comprising the facility; or any other similar minor administrative change at the facility   Yes No  1. If yes, did the facility provide written notification within 30 days of the change? [62-210.310(2)(d), F.A.C.]   Yes No					
Permit Effective Period – [62-210.310(3)(a), F.A.C.]  1. Is the general permit for this facility still within the 5 year effective period? $\boxtimes$ Yes $\square$ No					
2. Did the facility submit the new re-registration form at least 30 prior to permit expiration? Yes 🔲 No					
New or Modified Process Equipment or Change in Ownership					
1. Since the last registration form submittal has there been [62-210.310 (2)(b)2]  a) installation of any new process equipment?					
Noncompliance Notice: - [62-210.310(3)(i), F.A.C.]  1. Did the facility have any instances where they were unable comply with or will be unable to comply with any condition or limitation of the air general permit?					
PART VI: Comments					

## O&M Plan

The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to:

- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
  - a. When maintenance and observations were performed;
  - b. What maintenance and observations were performed; and
  - c. Who performed said maintenance and observations.
  - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Reviewed records for the months of 7/30/07 through 9/4/08 indicated emission unit in compliance. The facility last pneumatic loading the silo on 11/15/07.

Comments: The last test was conducted on 11/15/07, and the test results were submitted on 11/28/08.

Mr. Bailey stated that his concrete business has been terrible. He stated he has not able to pneumatic loading silo since 11/15/07,

because his concrete business has been dead. He stated he had put his	concrete business for sale and waiting for a buyer. I was not			
Able to perform visible emissions test, because no pneumatic loading of the silo at the time. Mr. Bailey stated he had no idea as to				
when he would pneumatic loading the silo. I informed Mr. Bailey the next time the silo is pneumatic loaded a Visible Emission Test				
is required. I remind Mr. Bailey the General Permit would be due for a renewal in 12/9/10.				
Exit Interview: I informed Mr. Bailey, that it appears the emission unit is	s in compliance.
