COMMENTS: Florida Department of Environmental Protection ("Department") representative John Vigliotti, Engineering Specialists, met with Mr. Kelly Folsom, Plant representative, of Tarmac, of Longwood RM Concrete Plant, (Company") at its facility located at 1450 CR 427/Ronald Raegan Boulevard. Mr. Vigliotti explained that the Department is conducting a baseline inspection and providing compliance assistance. The facility has been subject to the following rules: Method 9 V.E. testing Rule No. 62-296.413(2), F.A.C.;(thirty Min.), with a minuimum Silo Rate of 25 Tons/Hr. During Loading. Rule 62-210.300(3) F.A.C. (Rolling 12- Month fuel consumption). Rule 62-296.414(2) F.A.C. (Unconfined Field Emissions).

The last V.E. was conducted on 04/08/2004. The Ready- Mix Concrete Batching Facility utilizes cement, flyash, slag and aggregate materials to produce ready-mix concrete. Dust emissions generated during the filling of the plant's silos or loading of

concrete mixer trucks are controlled by dust collectors. The facility was found to be in compliance based on quantities and test reports received. Please see project file folder.
