COMMENTS: Boxes not checked means not applicable due to type of operation or new rule in effect since January 10, 2007.

On September 24th 2008, Joe Panetta and I, Malik Pickering, conducted a follow up inspection at this facility. During the morning inspection at the Hudson facility (7775393), we spoke to Lewis Broadrick, who expressed that he would like to have the Land O' Lakes facility (this one...1010499) to use as a mobile unit. Joe Panetta expressed to Mr. Broadrick that he had this conversation with Ron Broadrick (who is the son of Lewis Broadrick and co owner) during the last inspection in November of 2007 and also that they will need to submit another registration form for a relocatable permit.

Later that afternoon we met with Doug Stanley at the Land O' Lakes facility. Mr. Stanley is the manufacturing shop manager for the facility. Mr. Stanley explained to us that he unit was not it use at the time and he took us to see it at the rear of the property. I took some pictures to verify that the unit was not in use.

Back at the office a records review was conducted for 1010499. We found that the last VE test was performed on March 30, 2007. The next VE test was due on or before March 30, 2008, which means that the VE test was more than a year overdue.

*This facility as far as the walk through inspection is concerned is incomplicance. The facility will be referred to enforcement on a later date for the failure to submit a VE test by March 30, 2008.
