

## Florida Department of Environmental Protection

Northwest District 160 W. Government Street, Suite 308 Pensacola, Florida 32502-5740 Rick Scott Governor

Jennifer Carroll Lt. Governor

Herschel T. Vinyard Jr. Secretary

July 27, 2011

By Electronic Mail, Received Receipt Requested smlewis6@bellsouth.net

Mr. Michael S. Lewis, Director Lewis Funeral Home dba Fields of Faith Crematory & Tribute Center 6405 Highway 90 West Milton, Florida 32570

Dear Mr. Lewis:

On July 20, 2011, a Department representative with the Air Resource Management Program inspected your facility, ID 1131128. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was in compliance at the time of the inspection for those items specifically noted in the inspection report. Please note that authority to operate this facility expires on September 15, 2012. To avoid lapse of authority to operate, an owner or operator intending to continue to use an air general permit must submit the proper registration form and processing fee at least 30 days prior to expiration of the facility's existing air operation permit or air general permit.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact Jennifer Waltrip at 850/595-0662 or e-mail jennifer.waltrip@dep.state.fl.us.

Sincerely,

Carol Melton

Air Compliance Supervisor

Carol Melton

CM/jw/c

Enclosure

## **HUMAN CREMATORY**

## COMPLIANCE INSPECTION CHECKLIST

## Emissions Unit Section 1 – Human Crematory with a multi-chamber combustion unit.

PART I: FILE REVIEW PRIOR TO INSPECTION			(check <b>☑</b> only one			
		box for each question)				
1.	a. Complete AC application or, if no AC permit, initial GP registration received on or after August 30, 1989?	⊠ Yes	□No			
	b. If yes, were design calculations provided then to confirm a sufficient volume in the secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees Fahrenheit?	⊠ Yes □ Yes	No ⊠No			
4.	Past Visible Emissions (VE) tests:  a. Was a VE test performed within each of the past 4 calendar years?  b. Has a VE test been performed yet within the current calendar year?  c. If first year of operation, was a VE test performed within 30 days of commencing	☐ Yes ☐ Yes	⊠No ⊠No			
	operation? N/A  d. Date of last VE test: 5/20/10	☐ Yes	□No			
	e. Was the VE test report filed with the compliance authority no later than 45 days after the test?  f. Did the facility demonstrate compliance during the last VE test?  If no, what was the problem (if known)?		□No □No			
	3) at an annual 1 P 1 2 2 4 (					
PA	PART II: VISIBLE EMISSIONS TESTING  (check only one box for each question)					
1.	Was a visible emissions test conducted by the facility for this unit during this site visit?  a. Was the test conducted with the unit operating at a capacity of one adult-sized cadaver?  b. Was the visible emissions test conducted according to EPA Method 9?	Yes	⊠No □No □No			
	c. The visible emission test resulted in an opacity of % for the highest six minute average. d. Did the visible emission test demonstrate compliance with the limit? (5% opacity, six-minute average, except that visible emissions not exceeding 15% opacity shall be allowed for up to six minutes		□No			
2.	Was a visible emissions test conducted by the inspector during this site visit?	Yes Yes	<ul><li>No</li><li>No</li><li>No</li></ul> □No			
3.	Is there any reason to ask for a special test to determine compliance with the PM and CO standa  If yes, what reason?		<u></u> No			
			71			
PA	ART III: MONITORING/RECORDKEEPING REQUIREMENTS	(check <b>v</b> box for each	only one question)			
1.	Were there any objectionable odors detected?	- Yes	⊠No			
	An upwind/downwind survey of the facility was conducted. The observed parameters were:  Downwind odor level detected-  Wind direction -  Upwind odor level detected-	(1-10)				
	Continuous Monitoring Systems –					
	Is a continuous temperature monitoring system installed on each unit to record temperatures in the secondary chamber in accordance with the manufacturer's instructions?	⊠ Yes	□No			
D	Is the temperature probe properly placed, at least at the distance where the 1.0 second gas residence time at $\boxtimes 1,800^1$ $\square 1,600^2$ degrees was determined?	⊠ Yes	□No			

PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)							
c. Are the following records kept on file, available for inspection, for at least the past two years?	_	_					
All temperature measurements     all continuous monitoring systems, monitoring devices, and performance testing measurements;	⊠ Yes	∐No					
monitoring system all continuous performance evaluations	Yes	□No					
3) All CEMS or monitoring device calibration checks (last performed on (6/30/11)		No					
4) Adjustments		∐No □No					
6) Corrective maintenance performed on systems/devices	Yes	□No					
d. Are the temperature charts properly documented with operator name, operator indication of	_	_					
when cremation in the primary chamber was begun, date, time, and temperature markings	Yes	□No					
e. Was the crematory unit installed after <b>2/1/07</b> ? If no, skip e.(1) – (3)	Yes	⊠No					
(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatical control combustion based on continuous in-stack opacity measurement?	∏ Yes	ПNo					
(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity							
exceeds 15% opacity?	Yes	□No					
(3) Has the opacity measurement system been cleaned and checked for proper operation in accordance with the manufacturer's recommended maintenance schedule?	☐ Yes	ПNо					
PART IV: SECONDARY COMBUSTION ZONE TEMPERATURES	(check <b>☑</b>	only one					
I MAI IV. DECOMDING COMBOSTION ZONE TEMI EMITORES							
	box for each	question)					
	box for each	question)					
1. If the application to construct was <b>BEFORE</b> August 30, 1989 is the:	box for each	question)					
If the application to construct was <u>BEFORE</u> August 30, 1989 is the:     a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?	☐ Yes	question)					
If the application to construct was <u>BEFORE</u> August 30, 1989 is the:     a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?  b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the crematical secondary.	Yes on	□No					
If the application to construct was <u>BEFORE</u> August 30, 1989 is the:     a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? ————     b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the crematic process begins in the primary chamber? ————————————————————————————————————	☐ Yes
