COMMENTS: On April 19, 2011 I visited this facility to conduct the anuual comliance inspection and to witness the visible emissions tests. On site I met Peter Dourvetakis, Plant Manager of the facility. Bruno Ferraro from Grove Scientific conducted the emissions tests on sixteen emissions points. During the tests the silos were loaded at more than 25 tons per hour and pumps at 10-12 PSI. DC-5 and DC-6 are no longer in operation, all the production equipments were removed. A new production line " High Speed Line # 7 " was installed and the new dust collector has not been installed. All the bags were replaced during the month of January and February, 2011. The entitlement expired on 6/1/2011 and an DEP application was delivered to Mr. Dourvetakis,
