Herschel T. Vinyard Jr. Secretary

July 29, 2011

Johnny A. Capps Quincy Printing & Graphics 1960 West Jefferson Street Quincy, Florida 32351

Dear Mr. Capps:

A Department representative inspected your facility to determine compliance with the Air Quality Operating Permit. The Air Program identification number for this facility is **0390042**. Your facility permit **expires on March15, 2012**. This letter applies only to activities covered by the Air Resource Management Program.

The Tallahassee Branch Office reported a status of In Compliance for your facility. Your facility compliance status may be subject to further review by the District Program Office.

The assistance you provided is appreciated. The inspection checklist is enclosed with this letter. If you have any questions, your local contact is Tracy White at (850) 245-2960 or Tracy.a.white@dep.state.fl.us .

Sincerely,

Marlane Castellanos Branch Manager

	IV: <u>SPECIFIC</u> <u>CONTROL/OPERATING/RECORDKEEPING CRITERIA</u> – Rule 62-210. heck ☑ appropriate box(es))	310(4)(f), F.A.C.
,	PECIFIC CONDITIONAL EXEMPTION REQUIREMENTS FROM TITLE V AIR PERMI	TTING (continued)
	V Operate only water based or ultraviolet aural material flavoranchia on anterior activities	lines
	V Operate only water-based or ultraviolet-cured material flexographic or rotogravure printing and use less than 400,000 pounds of water-based inks, coatings and adhesives, combined?;	
	VIOperate only solvent-based material flexographic or rotogravure printing lines and use less	
	than 100,000 pounds of inks, dilution solvents, coatings, cleaning solutions and adhesives,	
	combined?;	☐Yes ☐ No ☒ N/A
	Or;	raan on latte
	VII Operate any combination of heatset lithographic, non-heatset lithographic, digital, sorrotogravure or flexographic printing lines and use no more than the most stringent of the ma	
	contained in sub-sub-subparagraphs 62-210.310(4)(f)2.b.(I) through (VI), F.A.C., for the ty	
	facility. For purposes of determining which limit is the most stringent, the pounds of materi	
	lithographic lines and flexographic lines shall be converted to the equivalent gallons by divi	iding by 8.5 pounds per
	gallon and shall be compared with the limits for non-heatset offset lithographic, digital, screen	een and letterpress lines, as
	applicable, for the type of printing lines at the facility. The most stringent limit shall apply t	
	containing material used?;	∐Yes ∐ No ⊠ N/A

3 of 4 Revised 09/14/07

(Refer to the chart & information below to identify the Printing Process combination(s) and to determine the most stringent limit for the combination(s) chosen.)

	PRINTING PROCESS	INDIVIDUAL PROCESS LIMITS (IPL)	STRINGENT LIMITS FOR COMBINATIONS (SLC) (SLC = IPL* ÷ 8.5 lbs/gal.**)
#1	Heatset Offset Lithographic	100,000 lbs.*	11,765 gals.**
#2	Non-heatset Offset Lithographic	14,250 gals.	14,250 gals
#3	Digital	12,100 gals.	12,100 gals.
#4	Screen or Letterpress	14,250 gals.	14,250 gals
#5	Water-based or UV cured Rotogravure or Flexographic	400,000 lbs.*	47,059 gals.**
#6	Solvent-based Rotogravure or Flexographic	100,000 lbs*	11,765 gals**

(<u>Example</u>: If you were a printer and your combination printing processes included both <u>Printing Process</u> numbers **two** (2) and **five** (5), then the most stringent limit shall apply to the total of all solvent-containing material used. In this example, the individual <u>Stringent Limit for Combinations</u> (<u>SLC</u>) for each process is 14,250 gals. and 47,059 gals., respectively. Therefore, the most stringent limit for this combination would be 14, 250 gals.)

6. Does the facility cause, suffer, allow or permit the di an objectionable odor? (Rule 62.296.320(2), F.A.C.)		N/A
