**COMMENTS:** Pre-inspection Review: This facility's entitlement became effective in January 2008. No initial inspection has been conducted at this facility. Emission Units are still marked "C" (under construction) in ARM's. Inspection Findings: Arrived at destination where facility should be located and found empty lots. Photos were taken during my visit at this location and are attached to this inspection report. On 05/22/2009, I spoke with Mike Mahoney of Prestige Gunite Florida to see if the company would like to surrender the General Permit Entitlement. Mr. Mahoney stated he may send a letter to surrender the entitlement since the facility has not been built but would need to speak with Prestige Management. Department never received letter, therefore facility is still active and should be revisited in the future.
