

$\frac{\textbf{NON-METALLIC MINERAL PROCESSING}}{\underline{\textbf{PLANTS}}}$

COMPLIANCE INSPECTION CHECKLIST

IN	SPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI) RE-INSPECTION (FUI) ARMS COMPLAINT NO:						
ΑI	RS ID#: 1050405 DATE: <u>10/13/2010</u> ARRIVE: <u>3:30 p.m.</u> DEPAR	T: <u>4:45 p.m.</u>					
FA	ACILITY NAME: HAINES CITY FACILITY SCREENING OPERATION						
FA	ACILITY LOCATION: 1980 Marley Drive						
	HAINES CITY 33844-9202						
CC	OWNER/AUTHORIZED REPRESENTATIVE: CHARLES PIWOWARSKI PHONE: (863)421-7422 Email: Mobile: CONTACT NAME: SCOTT SIMPSON PHONE: Email: Mobile: ENTITLEMENT PERIOD: 5/27/2007 / 5/27/2012 (effective date) (end date)						
Facility Section							
PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box) ☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE							
			1				
	Name(s) of facility representative(s): <u>Charles Piwowarski, Paul Carpenter, Scott Simpson</u> Brief Notes:	(check ☑ box for each	only one question)				
2.	Is the Authorized Representative still CHARLES PIWOWARSKI?	Yes	□No				
3.	If different, did the facility provide an administrative update within 30 days? Is the facility contact still? If no, who is?:		□No □No				
4.	Will facility be conducting VE test(s) during today's inspection?		⊠No □No				

Emissions Unit Section 1 –EZ Screen 1200XL (Located at concrete Batch Plant)

		(check 🗹	only one			
	t	ox for each	question)			
Is ·	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processin		,			
15	{Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majorit is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granit Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chloi and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	y e, Gravel; Salt; ride, Kernite,				
2. 3.	Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?		⊠No □No □No			
sul If t	If answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to subpart OOO so skip the following questions and go directly to Question 24. If the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.					
5.	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process		⊠ N			
6	any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	☐ Yes	⊠No			
	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	Yes	□No			
	capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	☐ Yes	⊠No			
σ.	Is the EU located at a common clay plant or pumice plant with capacity less than or equal to 9 megagrams/hour (10 tons/hour)?	Yes	⊠No			

1 -EZ Screen 1200XL (Located at concrete Batch Plant)

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or belt conveyor in a production line that processes saturated material up to the first crusher, grinding mill or storage bin in the production line?	ed ! ig	Yes	⊠No
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line downstream of wet mining operation that process saturated material up to the first crusher, grinding mill or storage bin in the production line?		Yes	⊠No
	{Note: Wet mining operation means a mining or dredging operation designed and operated to extract any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic mineral is saturated with water. "Saturated material" means mineral material with sufficient surface moisture such that particulate matter emissions are not generated from processing of the material through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
su	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.			
11	When was the EU last constructed, modified, or reconstructed? 5/3/2007			
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?		Yes	⊠No
<i>If</i>	answer to Question 12 is "No" skip the following questions and go directly to Question 20			
13	Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	⊠No
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19			
14	a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?		Yes Yes Yes Yes	☐ No ☑No ☑No ☑No
15	If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not individually in compliance with emissions limits: a. Was an initial PM stack test performed on each vent control device within 180 days of initial startup of the EU? ———————————————————————————————————		Yes	□ No
	one or more affected EUs.} b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)? c. Was an initial VE test performed on fugitive emissions from non-vent building openings? d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?		Yes Yes Yes	□No □No □No

1 –EZ Screen 1200XL (Located at concrete Batch Plant)

16. Is a baghouse used to control emissions from the EU?	Yes	⊠No
If yes, the owner operator: conducts quarterly 30-minute VE tests using Method 22; uses a bag leak detection system specified in 40 CFR 60.674(d); follows the requirements of 40 CFR 63AAAAA Lime Manufacturin as specified in 40 CFR 60.674(e); or none of the above (i.e., out of compliance)	ng	
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity? N/A	☐ Yes	☐ No
18. Is a wet scrubber used to control emissions from the EU?	Yes	⊠No
 a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	☐ Yes	□No
 b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.} 	Yes	□No
19. Is wet suppression used to control emissions from the EU?	Yes	⊠No
 If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)? 	☐ Yes	□No
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.		
20. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	☐ Yes	⊠No
a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	☐ Yes ☐ Yes ☐ Yes ☐ Yes	☐ No ☐No ☐No ☐No

<u>1 –EZ Screen 1200XL (Located at concrete Batch Plant)</u>

22. If the EU is a building enclosing any		and all enclosed EUs are not			
individually in compliance with emi					
a. Was an initial PM stack test perform	ned on each vent contro	ol device within 180 days of			
initial startup of the EU?			/A	☐ Yes	∐ No
{A "vent" is any opening through whi					
purpose of exhausting from a building	air carrying particular	te matter (PM) emissions from			
one or more affected EUs.}	14 4 70 64				
b. Was the EU found to be in complia				∐ Yes	∐No
c. Were initial fugitive emissions from	n non-vent building ope	enings less than or equal to 7%	opacity?	∐ Yes	∐No
23.Is a wet scrubber used to control em	issions from the EU?			Yes	⊠No
If yes, does the owner/operator mainta					
a. a device for the continuous measure	ement of the pressure lo	oss of the gas stream through the	е		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's					
instructions?				☐ Yes	□No
{Note: The monitoring device m	ust be certified by the r	nanufacturer to be accurate with	nin +250		
pascals +1 inch water gauge pres	ssure.}				
and					
b. a device for the continuous measure					
device has been calibrated on an				∐ Yes	∐No
{Note: The monitoring device m		nanufacturer to be accurate with	1111 +5%		
of design scrubbing liquid flow r	ate.}				
24. When was the last VE test conducted	d by the owner/operat	tor for this EU?			
a. If EU is not subject to 40 CFR 60 s	•	· · · · · · · · · · · · · · · · · · ·	years?	Yes	⊠No
b. If EU is subject to 40 CFR subpart					
i. has the EU been tested during				☐ Yes	□No
ii. has the EU been tested yet wit	hin the current calenda	r year?		☐ Yes	□No
25 Was a VE test conducted by the sur	/			□ V	⊠No
25. Was a VE test conducted by the <i>own</i> a. Was the VE test conducted at a pro				☐ Yes☐ Yes	□No
Rate:	cess rate that is represe	mative of the normal rate:			NO
b. Was the VE test conducted accordi	ng to FPA Method 9? -			☐ Yes	□No
c. The VE test resulted in an opacity of	of % for the high	est six-minute average		1 cs	
d. Did the VE test demonstrate compl	iance with the opacity	limit? (See chart below)		Yes	□No
u. 210 m. v 2 tost demonstrate comp.	inited with the spacing	(300 011111 0 010 11)			
26. Was a VE test conducted by the insp	<i>ector</i> for this unit du	ring this site visit?		Yes Yes	⊠No
a. Was the VE test conducted at a pro	cess rate that is represe	ntative of the normal rate?		Yes Yes	□No
Rate:					
b. Was the VE test conducted accordi				Yes Yes	□No

Facility Section (continued)

If no, where are unconfined emissions occurring? b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)?	Yes	
a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? N/A	Yes	
on a regular basis (to all stockpiles, roadways and work yards)? ————————————————————————————————————		
areas to reduce airborne particulate matter?	Yes	
particulate matter from stock piles?	Yes No	
a) Did the inspector perform a general VE test (20% opacity)?	Yes No	ļ
1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant?	Yes No YesNo	
1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant?		
a) 10 tons per year or more of any hazardous air pollutant?	ek only one reach question)	
· · · · · · · · · · · · · · · · · · ·	YesNo	
units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or		
b) any emissions units or activities authorized by another air general permit where such other air general permit and this general permit specifically allow the use of one another at the same facility? If YES, what other general permit units or activities? 1050372	Yes ⊠No	

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a) 275,000 gallons of diesel fuel? b) 23,000 gallons of gasoline? c) 44 million standard cubic feet on natural gas? d) 1.3 million gallons of propane? e) or an equivalent prorated amount if multiple fuels are used onsite (use equation below)? (No No No No No
GENERAL CONDITIONS 1. Has the owner or operator allowed the circumvention of any air pollution control device, or	(check 🗹 box for each	only one question)
Allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	- Yes	⊠No
2. Does the owner or operator:a) maintain the authorized facility in good condition?b) ensure that the facility maintains its eligibility to use the air general permit and complies with all	🛚 Yes	□No
terms and conditions of the air general permit?	- X Yes	□No
to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?		□No
RELOCATABLE PLANT	(check 🗹 box for each	only one
1. The facility: ⊠ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (<i>If only stationary, skip the following questions 2 and 3.</i>)		1,
 2. For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.9000 to the Department or Local Air Program no later than five business days following relocation? - 	(6)]	□No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air operapermit, and the relocatable NMMP plant is not included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose?	Yes	⊠No
the permitted facility?		□No ⊠No

Administrative Changes: 1. Were there any changes in the name, address, or phone num associated with a change in ownership or with a physical rel operations comprising the facility; or any other similar mine. 2. If YES, did the facility provide written notification within 3	ocation of the facility or any emissions units or or administrative change at the facility? Yes	only one n question) ⊠No □No
New or Modified Process Equipment or Change in Ownership: 3. Since the last registration form submittal has there been a) Installation of any new process equipment? b) Alterations to existing process equipment without replac c) Replacement of existing equipment with equipment that d) A change in ownership?	ement?	∷No∴No∴No∴No∴No
James Burkholder	10/13/2010	
Inspector's Name (Please Print)	Date of Inspection	
	10/13/2013	
Inspector's Signature	Approximate Date of Next Inspection	

COMMENTS: This permit is in conjunction with facility ID 1050372's Air Permit. This permit is for a screening operation, which does not require visible emissions testing.
