COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE:	ANNUAL (INS1, INS2) RE-INSPECTION (FUI)	COMPLAINT/E ARMS COMPL	DISCOVERY (CI)		
AIRS ID#: 7775407 DA	ATE:	ARRIVE:	DEPART:		
FACILITY NAME: TE	RIO CRUSHER				
FACILITY LOCATIO	N: #2 GUERDON RC	OAD			
	LAKE CITY				
OWNER/AUTHORIZE Email: scottc@ande CONTACT NAME: Email: ENTITLEMENT PERI		012	PHONE: (386)752-758 Mobile: PHONE: Mobile:	35	
Facility Section					
PART I: INSPECTION COMPLIANCE STATUS (check ✓ only one box) ☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE					
PART II: ONSITE INT	TRODUCTORY MEETIN	G		(check ☑ only one	
1. Name(s) of facility re		_		box for each question)	
Brief Notes:					
2. Is the Authorized Rep If no, who is?:	oresentative still SCOTT CL	EVELAND?		⊠ Yes □No	
	cility provide an administra still?			☐ Yes ☐No ☐ Yes ☐No	
4. Will facility be condu	ucting VE test(s) during toda iance authority notified at le	ay's inspection?east 15 days in advance?		☐ Yes ☐No ☐ Yes ☐No	

Emissions Unit Section

		(check ☑	only one
		box for each	question)
[s	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processi	ng Plants?	
	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processi {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majori is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Grani Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chla and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermic (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.} Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?	ity te, te, I Gravel; Salt; oride, , Kernite, culite;	∏No
2.	Is the EU located above ground (i.e., not in an underground mine)?	Xes	□No
3.	Was the EU constructed, modified, or reconstructed after August 31, 1983?	⊠ Yes	□No
	Is the EU one of the following?	Yes	□No
su	bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.		
5.	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process		
	any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	Yes Yes	⊠No
6.	Is the EU located at a fixed sand and gravel plant or crushed stone plant with a capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	☐ Yes	⊠No
7.	Is the EU located at a portable sand and gravel plant or crushed stone plant with a capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	Yes	
8.	Is the EU located at a common clay plant or pumice plant with capacity less than or equal to 9 megagrams/hour (10 tons/hour)?	☐ Yes	⊠No

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or			
	belt conveyor in a production line that processes saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?		Yes	⊠No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or			
	which separates marketable fines from the product by a washing process which is designed and operate			
	at all times such that the product is saturated with water. "Saturated material" means mineral materia			
	with sufficient surface moisture such that particulate matter emissions are not generated from processing			
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wett	ted		
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line			
	downstream of wet mining operation that process saturated material up to the first crusher,	_		
	grinding mill or storage bin in the production line?	Ш	Yes	⊠No
	[Note: Wet mining operation means a mining or dredging operation designed and operated to extract			
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic			
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface			
	moisture such that particulate matter emissions are not generated from processing of the material			
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by			
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
If a	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to			
	bpart OOO so skip the following questions and go directly to Question 24.			
	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.			
11	. When was the EU last constructed, modified, or reconstructed?			
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?		Yes	⊠No
If (answer to Question 12 is "No" skip the following questions and go directly to Question 20			
13	.Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	□No
	Hoods, rails, dampers, etc.) to capture and transport particulate matter to a control device:	ш	1 68	∐INO
If (answer to Question 13 is "No" skip the following questions and go directly to Question 19			
14	.Initial Tests:			
	a. Was an initial PM stack test performed on the control device within 180 days of	_		_
	initial startup of the EU? N/A		Yes	☐ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	\sqcup	Yes	∐No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Н	Yes	∐No
	d. If yes, was the opacity less than or equal to 7% opacity?	Ш	Yes	□No
15	.If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not			
	individually in compliance with emissions limits:			
	a. Was an initial PM stack test performed on each vent control device within 180 days of		==	,
	initial startup of the EU?	Ш	Yes	☐ No
	{A "vent" is any opening through which there is mechanically induced air flow for the			
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from			
	one or more affected EUs.}		V	□ Na
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)? c. Was an initial VE test performed on fugitive emissions from non-vent building openings?		Yes Yes	∐No ∏No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?		Yes	□No
	a or amount regard community from four containing openings less than or equal to 770 opacity.	Ш	1 00	

16. Is a baghouse used to control emissions from the EU?	Yes	□No
If yes, the owner operator: conducts quarterly 30-minute VE tests using Method 22; uses a bag leak detection system specified in 40 CFR 60.674(d);		
follows the requirements of 40 CFR 63AAAAA Lime Manufacturing	ng	
as specified in 40 CFR 60.674(e); or		
none of the above (i.e., out of compliance)		
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity? N/A	Yes	□ No
18.Is a wet scrubber used to control emissions from the EU?	Yes	□No
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	- Yes	□No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250	103	\\0
pascals +1 inch water gauge pressure.}		
and		
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the		□ N.
device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5%	⊥ Yes	□No
of design scrubbing liquid flow rate.}		
of design scrubbing riquid flow fate.		
19.Is wet suppression used to control emissions from the EU?	Yes	□No
If yes:		
a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?		
b. Does the owner/operator initiate corrective action within 24 hours and complete		
corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken,		
recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?	Yes	□No
	_	
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.		
20. Does the EU have a particulate matter capture system (equipment including enclosures,		
Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes Yes	□No
21. Initial Tests:		
a. Was an initial PM stack test performed on the control device within 180 days of		
initial startup of the EU?	Yes	☐ No
b. If yes, was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)?	Yes	□No
c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	□No
d. If yes, was the opacity less than or equal to 7% opacity?	Yes	No

2. If the EU is a building enclosing ar individually in compliance with em		and all enclosed EUs are not		
a. Was an initial PM stack test perfo initial startup of the EU?{A "vent" is any opening through when the end of t	rmed on each vent contr ich there is mechanical	ly induced air flow for the	N/A Yes	☐ No
purpose of exhausting from a building one or more affected EUs.}				
b. Was the EU found to be in complc. Were initial fugitive emissions from				□No □No
3.Is a wet scrubber used to control e	missions from the EU?	·	Yes	⊠No
If yes, does the owner/operator main a. a device for the continuous measus scrubber and the device has been instructions? {Note: The monitoring device in pascals +1 inch water gauge pro-	rement of the pressure len calibrated on an annu	al basis in accordance with man	nufacturer's Yes	□No
and b. a device for the continuous measured device has been calibrated on a {Note: The monitoring device of design scrubbing liquid flow	n annual basis in accord must be certified by the	ance with manufacturer's instru	actions? Yes	□No
a. If EU is not subject to 40 CFR 60 b. If EU is subject to 40 CFR subpar	subpart OOO, has the E		years? X Yes	□No
i. has the EU been tested during each of the past 4 calendar years?ii. has the EU been tested yet within the current calendar year?				□No □No
a. Was a VE test conducted by the own a. Was the VE test conducted at a property Rate:				□No □No
b. Was the VE test conducted accord			X Yes	□No
 c. The VE test resulted in an opacity of% for the highest six-minute average. d. Did the VE test demonstrate compliance with the opacity limit? (See chart below) 				□No
a. Was the VE test conducted by the <i>in</i> . Rate:				⊠No □No
b. Was the VE test conducted according to EPA Method 9? c. The VE test resulted in an opacity of% for the highest six-minute average.			Yes	□No
d. Did the VE test demonstrate comp			Yes	□No
	VE Opac	city Limits		
	EU not subject to 40 CFR 60 Subpart OOO	Subpart OOO EU constructed, modified, or reconstructed prior to 4/22/2008	Subpart OOO E constructed, moo or reconstructed after 4/22/2008	dified,
Crusher with no capture system	20%	15%	12%	
All other affected EUs	20%	10%	7%	

Facility Section (continued)

REASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check 🗹 box for each	only one question)
1. Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined		
emissions by: a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? \[\Boxed N/A \] If no, where are unconfined emissions occurring?	⊠ Yes	☐ No
b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control	⊠ Yes ⊠ Yes	□ No□ No
of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A	⊠ Yes	☐ No
e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles? N/A	Yes	☐ No
2. If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	Yes Yes	□ No □No
CONFIRMATION OF GENERAL PERMIT ELIGIBILITY	(check 🗹 box for each q	only one
1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant? b) 25 tons per year or more of any combination of hazardous air pollutants? c) 100 tons per year or more of any other regulated air pollutant?	Yes	⊠No ⊠No ⊠No
2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? If YES, what non-exempt units or activities?	r	⊠No
b) any emissions units or activities authorized by another air general permit where such other air gene permit and this general permit specifically allow the use of one another at the same facility? If YES, what other general permit units or activities?		⊠No

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a) 275,000 gallons of diesel fuel?		□No□No□No□No
GENERAL CONDITIONS	(1 1 17	1
1. Has the owner or operator allowed the circumvention of any air pollution control device, or	(check v box for each	only one question)
Allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	- Yes	⊠No
2. Does the owner or operator:a) maintain the authorized facility in good condition?b) ensure that the facility maintains its eligibility to use the air general permit and complies with all	X Yes	□No
terms and conditions of the air general permit?		□No
to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	_	□No
DELOCATABLE DI ANT		1
 RELOCATABLE PLANT 1. The facility: ☐ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (If only stationary, skip the following questions 2 and 3.) 	(check v box for each	only one question)
 2. For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900 to the Department or Local Air Program no later than five business days following relocation? - 	(6)]	□No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air oper permit, and the relocatable NMMP plant is not included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose? If YES, what was the purpose? {Note: crushing recycled asphalt pavement (rap) at an asphalt plant is considered routine and so therefore must be authorized in the facility's air construction or operation permit.} b) were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?		□No □No □No
11 123, were any periods more than 6 months in any consecutive 12-month period?	☐ 1 es	□110

CHANGES Administrative Changes:	(check ☑ only one box for each question)	
 Were there any changes in the name, address, or phone number of the facility or authorized representative not associated with a change in ownership or with a physical relocation of the facility or any emissions units or operations comprising the facility; or any other similar minor administrative change at the facility? Yes If YES, did the facility provide written notification within 30 days of the change?		
New or Modified Process Equipment or Change in Ownership:		
 3. Since the last registration form submittal has there been a) Installation of any new process equipment? b) Alterations to existing process equipment without replacement? c) Replacement of existing equipment with equipment that is substantial. d) A change in ownership? 4. If the answer to any question 3a. – d. is YES, was a new registration for 30 days prior to the change? 		
Stuart Bartlett	11/15/11	
Inspector's Name (Please Print)	Date of Inspection	
Inspector's Signature	Approximate Date of Next Inspection	
COMMENTS: Witnessed part of VE testing. No visible emissions observe the unit in lieu of a spray bar.	ved. Facility wets the material prior to putting it through
