Dr. Ray Mobley, DVM Florida A&M Research & Extension Service 4259 Bainbridge Highway Quincy, Florida 32352

Dear Dr. Mobley:

A Department representative inspected your facility to determine compliance with the Air Quality Operating Permit. The Air Program identification number for this facility is 0390043. Your facility permit <u>expires on June 30, 2012</u>. This letter applies only to activities covered by the Air Resource Management Program.

Based on the facility inspection results, the Tallahassee Branch Office reported a status of <u>In-Compliance</u> for your facility. Note that your facility compliance status may be subject to further review by the District Program Office.

The assistance you provided is appreciated. You are encouraged to review the enclosed inspection checklist and its comments section. If you have any questions, your local contact is Tracy White at 850/488-3704 or <u>tracy.a.white@dep.state.fl.us</u>.

Sincerely,

Maclane Castellanor

ANIMAL CREMATORY

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI) RE-INSPECTION (FUI) ARMS COMPLAINT NO:					
AIRS ID#: 0390043 DATE: 7/01/2009 ARRIVE: DEPART: FACILITY NAME: FLORIDA A&M RESEARCH & EXTENSION CENTER FACILITY LOCATION: 4259 Bainbridge Hwy QUINCY 32352 OWNER/AUTHORIZED REPRESENTATIVE: RAY MOBLEY PHONE: (850)412-5252 CONTACT NAME: ENTITLEMENT PERIOD: 6/30/2007 / 6/30/2012 (effective date) (end date)					
PART I: INSPECTION COMPLIANCE STATUS (check I only one box) IN COMPLIANCE MINOR Non-COMPLIANCE SIGNIFICANT Non-COMPLIANCE					
PART II: TESTING/RECORDKEEPING REOUIREMENTS – Rule 62-296.401, F.A.C. (check					

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es))

1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record t		
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber co		
accordance with the manufacturer's instructions?		∐ No
a) Do temperature probes seem to be properly placed?	⊠Yes	🗌 No
b) Are the following records kept on file, available for inspection for at least two years following the rec	cording of	f such
measurements, maintenance, reports and records?		_
1) All measurements (including CEMS)	Yes	🗌 No
2) Monitoring device	Yes	No No
3) Performance Testing Measurements	Yes	🗌 No
4) CEMS Performance Evaluation	Yes	🗌 No
5) All CEMS or monitoring device calibration checks	Yes	No No
6) Adjustments	Yes	No No
7) Preventive maintenance performed on systems/devices	Yes	🗌 No
8) Corrective maintenance performed on systems/devices	Yes	🗌 No
2. Was this crematory unit constructed: (check only one \square box)		
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)		
b) ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)		
3. If constructed BEFORE August 30, 1989 is the:		
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F?	Yes	No No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F	_	
throughout the combustion process in the primary chamber?	Yes	No No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature		
is equal to or greater than 1400°F?	Yes	□ No
d) required monitoring equipment installed and operational, and providing continuous monitoring to		
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the		
secondary chamber combustion zone according to the manufacturer's instructions?	Yes	No No
4. If constructed <u>ON</u> or <u>AFTER</u> August 30, 1989 is the:		
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence tim	ie	
@ 1800° F?	Yes	□ No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600° F		
throughout the combustion process in the primary chamber?	⊠Yes	□ No
c) secondary chamber combustion zone temperature equal to or greater than 1600° F before the cremation		
process begins in the primary chamber?	Yes	□ No
5. Are appropriate leak-proof containers containing no more than 0.5 % (percent) by weight chlorinated		
plastics used during the cremation of dead animals?	Yes	No No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the		
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of		
their use and for at least two years after their use?	Yes	□ No
b) If plastic bags are used for the cremation of animals are they non-chlorinated and no less than 3 mils	105	
thick?	Yes	□ No
c) Are dead animals, which have been used for medical or commercial experimentation, or other		
materials, including biomedical wastes (Rule 62-210.200, F.A.C.), incinerated at this location?	Yes	□ No
6. During this review period, was the largest batch load cremated 500 pounds per hour or less?		No
 During this review period, was the targest batch load cremated 500 pounds per hour of ress. Have all crematory operators been trained and certified by a Department-approved training program? 	\boxtimes Yes	
a) Are copies of the training certificates all crematory operators kept on file at the facility for the duration		
of the operator's employment & for an additional two years after termination of employment?		🗌 No
of the operator's employment & for an additional two years after termination of employment?	105	

PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-296.401, F.A.C. A. New or Modified Process Equipment

1	Since the last inspection has there been		
1.	a) installation of any new process equipment?	⊠Yes	No
	b) alterations to existing process equipment without replacement?	Yes	No
	c) replacement of existing equipment substantially different than that noted on the most recent notification form?	Yes	No
	d) If you answered <u>YES</u> to any of the above, did the owner submit a new and complete notification form and appropriate fee (Rule 62-4.050, F.A.C.) to the appropriate DEP or		
	local program office?	⊠Yes	No
2.	If a crematory unit has been modified to the extent that a Department air construction permit was required, have all operators been retrained to operate the modified unit?	□Yes	No
3.	In the case of new or modified equipment, where a Department air construction permit was required, has the owner submitted copies of all operator training certificates?a) submitted within the 15 day required window following the training?	☐Yes ☐Yes	□No □No

COMMENTS:

The purpose of this inspection was to witness the Method 9 compliance testing of the new crematory. I met with the VE consultant, Luis Llorens, and the Operator, Godfrey Nurse. I arrived after the scheduled start time and the testing was in progress. An 800 lb. batch was said to have been loaded. No excess emissions were noted. A temperature chart was loaded in the data logger. I briefly reviewed some of the recordkeeping requirements with Mr. Nurse.

Apparently this was the first use of the machine. A June 26, 2007 letter to Dr. Ray Mobley indicated that the permit registration form was received by the Department.

Machine information: Model CBI 20U, Serial number A-0605-58J-CB1200 OJ. A primary and secondary chamber was present. The machine appeared to be operated on gas. The machine also appeared to have an opacity device located in the stack.

Note: Some parts of this checklist could not be completed due to insufficient information or because the facility is new (first operation). Recordkeeping will be reviewed upon the next inspection. Plastic containers (bags, etc.) should have a manufacturer's data sheet available.

Recommendations:

Please have a copy of the operations manual located onsite and please review the regulatory requirements for operation and recordkeeping that are located in your registration form.

A copy of the compliance test was received at my office on July 6, 2009. The test will be reviewed by the District office for compliance determination.
