<ul> <li>O&amp;M Plan</li> <li>The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&amp;M) plan. The O&amp;M plan shall include, but is not limited to: <ol> <li>Operating parameters of the pollution control device;</li> <li>Time table for the routine maintenance of the pollution control device as specified by the manufacturer;</li> <li>Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;</li> <li>A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;</li> <li>A record log which will indicate, at a minimum: <ol> <li>When maintenance and observations were performed;</li> <li>What maintenance and observations were performed; and</li> <li>Who performed said maintenance and observations.</li> <li>Acceptable parameter ranges for each operational check.</li> </ol> </li> <li>[Pinellas County Code, Subsection 58-128]</li> </ol></li></ul> <li>Comments: I reviewed records for the months of 6/1/13 to 6/3/14 indicated the emission unit in compliance.</li>			
The facility yard was paved, and well maintained to reduce unconfined emissions. No fugitive dust was observed in the paved yard.			
Sprinklers were observed operating on stockpiles along with windbreaks being utilized. I was not able to perform visible emission			

test, because no pneumatic loading of the silo at the time. I told Mr. Davis to let me known when they plan to pneumatic loading the

silo.	
Exit Interview: I informed Mr. Davis, that it appears the facil	lity is in compliance.
