PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es)) 1. Were there any objectionable odor(s) detected?————————————————————————————————————	Yes No Yes No
PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.401, F.A.C. (check ☐ appropriate box(es)) 1. Were there any objectionable odor(s) detected?————————————————————————————————————	Yes No Yes No Yes No Yes No Yes No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-296.401, F.A.C.	
(check ☑ appropriate box(es))	
1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record	temperatures in the
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber co	
accordance with the manufacturer's instructions?	
a) Do temperature probes seem to be properly placed?	
b) Are the following records kept on file, available for inspection for at least two years following the records to the following the following the records to th	
measurements, maintenance, reports and records?	vorumg or swell
1) All measurements (including CEMS)	□Yes □ No
2) Monitoring device	
3) Performance Testing Measurements	Yes No
4) CEMS Performance Evaluation	
5) All CEMS or monitoring device calibration checks	
6) Adjustments	Yes No
7) Preventive maintenance performed on systems/devices	
8) Corrective maintenance performed on systems/devices	Yes No
2. Was this crematory unit constructed: (check only one ☑ box)	
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)	
b) ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)	
On on AFTER August 50, 1767: (If this box enceased, skip #5 and continue on to #4)	
3. If constructed BEFORE August 30, 1989 is the:	
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F ?	□Yes □ No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F	
throughout the combustion process in the primary chamber?	□Yes □ No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature	
is equal to or greater than 1400°F?	□Yes □ No
d) required monitoring equipment installed and operational, and providing continuous monitoring to	
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the	
secondary chamber combustion zone according to the manufacturer's instructions?	□Yes □ No
secondary chamber combustion zone according to the manufacturer's instructions:	
4. If constructed ON or AFTER August 30, 1989 is the:	
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence time.	ne
@ 1800° F?	⊠Yes □ No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	Z105 110
throughout the combustion process in the primary chamber?	⊠Yes □ No
c) secondary chamber combustion zone temperature equal to or greater than 1600°F before the crematic	
process begins in the primary chamber?	Yes ☐ No
5. Are appropriate cremation containers containing no more than 0.5 % (percent) by weight chlorinated	
plastics used during the cremation of dead human bodies?	⊠Yes ☐ No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the	
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of	
their use and for at least two years after their use?	⊠Yes □ No
b) Are there any other materials, including biomedical wastes (Rule 62-210.200, FAC) incinerated at	
this location?	□Yes ⊠ No
6. Have all crematory operators been trained and certified by a Department-approved training program?	Yes ☐ No
a) Are copies of the training certificates for all crematory operators kept on file at the facility for the dur	
of the operator's employment & for an additional two years after termination of employment?	
of the operator's employment & for an additional two years after termination of employment?	⊠Yes ∐ No

PART IV: SPECIAL CONDITIONS AND PROCEDUL A. New or Modified Process Equipment	RES – Rule 62-296.401, F.A.C.	
 c) replacement of existing equipment substantial recent notification form? d) If you answered <u>YES</u> to any of the above, did notification form and appropriate fee (Rule 6) 	hout replacement?	
local program office?		
Wanda Parker-Garvin	12/16/09	
Inspector's Name (Please Print)	Date of Inspection	
Inspector's Signature	Approximate Date of Next Inspection	

COMMENTS: On December 16, 2009, Ms. Wanda Parker-Garvin of FDEP visited the subject facility to conduct a level 2 compliance inspection. Contact was made with Mr. Glenn Strunk, Owner, Mr. Victor Hankins and Mr. George Hart, Crematory Operators.

- 1. An inspection of the crematory unit (Super Power Pak III; Model #IE43-SPP; Serial #0010108) was conducted. The location of the thermocouple was identified and documented in a subsequent site visit on 1/25/10.
- 2. The temperature readings from the program logic controller (PLC), analog temperature chart, and the Department's digital thermometer were in agreement with each other. The crematory unit was in operation with a 110 pound body. The following temperature readings were documented: Program Logic Controller = 1649 degrees F; Analog Temperature Chart = 1650 degrees F; Digital Thermometer = 1601 degrees F.
- 3. The opacity reader was operating and the stack for the unit was observed. No visible emissions were observed; a Method 9 evaluation was not necessary. No objectionable odors were detected.
- 4. Temperature charts and maintanence records were reviewed. The operator licenses/certifications were reviewed. The temperature charts indicated cremations were conducted at temperatures above 1600 degrees F. There were no major maintenance issues.
- 5. Question 4 in Part II, questions b) 1), and 3 in Part III, and questions 1d, 2, and 3 in Part IV are not applicable.
