(<u>Example</u>: If you were a printer and your combination printing processes included both <u>Printing Process</u> numbers **two** (2) and **five** (5), then the most stringent limit shall apply to the total of all solvent-containing material used. In this example, the individual <u>Stringent Limit for Combinations</u> (<u>SLC</u>) for each process is 14,250 gals. and 47,059 gals., respectively. Therefore, the most stringent limit for this combination would be 14, 250 gals.)

**COMMENTS:** I met with Mr. Max Luedtke on 5/22/14 and the facility is no longer in business at this location. The facility is in the process of being dismantled and shipped to their other locations across the United States. The facility had 180 employees as of February 2014. As of the day of inspection the facility is down to approximately 30 employees and will be completely through by the the second week in June. As of July 1, 2014, the facility will be surrendering their Air General permit for this location according to Mr. Luedtke. No violations noted at the time of inspection.
