**COMMENTS:** On December 02, 2013 I visited this facility to verify the current operational status of the facility. On site I met Gerritt Walsh, the current owner of the facility as of July, 2013. According to Mr.Walsh, he is processing the Entitlement and the Air Permit with a consultant. He has started to manufacture three (3) boats. In stock I observed seven (7) - 55 gallon drums of styrene containing resin and one (1) -55 gallon drum of gel-coat. No objectionable odor was detected inside or outside the facility.
