COMMENTS: This drive-by inspection was conducted to confirm this facility was up and operating. According to last information, the facility was found constructing without a permit. I arrived near the facility at approximately 1:30pm. I noted trucks were going in and out of the facility. There were no fugitive emissions from dust collectors and the yard was also free of large amounts of particulate. According to the ARM's database, this facility did not conduct testing in 2008. Need to contact them to see if testing was conducted, but not submitted to the Department. Photos were taken during this inspection, but I did not go on-site on this day. On 03/19/2009, I spoke with Mr. Richard Hire who is the Authorized Representative for this facility. Mr. Hire stated he would need to contact his consultant to find out if the testing was missed. On 03/16/2009, Mr. David W. Jones contacted me to provide test notification for the facility's 2009 Visible Emissions Testing. The testing will be conducted on 04/06/2009. A full compliance inspection will be conducted on that day and I will confirm if the 2008 testing was missed also.
