COMMENTS: On October 28, 2011 I visited this facility to conduct the annual compliance inspection and to attend the visible emissions test. On site I met Roberto Tombo, the owner of the facility. Tony Mazpule, the consultant Engineer was present for the test. William Arlington, Arlington Environmental Services, conducted the visible emissions tests. The concrete batch plant has two silos, each with a dust collector. The VE test on weigh hopper dust collector started at 9:42 AM. And the VE test on the east silo started at 9:54 AM and the west silo started at 10:34 AM. Both silos were loaded with cement at a rate of 10 PSI and 26.40 tons per hour. This facility produces approximately 3000 yards of concrete per month. No visible emissions were observed during the two VE tests. Also, no fugitive particulates were observed around the facility.
