COMMENTS: This facility had never been inspected to confirm registration paperwork. This facility began construction, but was never completed. Please see attached pictures. Baghouse was laying on its side and conveyor units were very clean...did not seem to have ever been used. Need to contact Mike Mahoney to see if company would like to relenquish permit. Originally, the facility was to have 2 silos, 3 hoppers, 2 conveyors and a central baghouse. The contact I spoke with on site stated 2 silos were moved off site about 2 moths ago and he confirmed that the facility did not finish constructing the plant and the plant never operated. I contacted Mr. Mike Mahoney on 10/06/2008 and left a message for him to contact me. This facility is located on the same site as the Sumter Cement Company which is south of CR 48 on CR 478. On October 23, 2008, the Department received a letter from Mr. Mike Mahoney relinquishing the permit for this facility.
