COMMENTS: Mr. John Hirsbrunner, Operations Manager, who provided me with all requested records and escorted me on the inspection of the plant, met me upon my arrival. Visible emissions' testing was performed on August 4, 2008, with a reported opacity level of 0%. VE testing for federal fiscal year 2009 must be performed before September 30, 2009. The facility is well maintained and clean. Most of the working yard is paved and fugitive particulate emissions are adequately controlled. During calendar year 2008 the plant produced 18,645 tons of product. During the 12-month time period from June 2008 through May 2009, 18,265 tons of product have been produced.
