NON-METALLIC MINERAL PROCESSING PLANTS

COMPLIANCE INSPECTION CHECKLIST

	E-INSPECTION (FUI)	ARMS COMPLAINT	NO:
AIRS ID#: 7775490 DATE		ARRIVE: <u>12:36 PM</u>	DEPART: <u>1:16 PM</u>
FACILITY NAME: MARE	KS BROTHERS		
FACILITY LOCATION:	4200 NW 36th St Concou	rse "C"	
	MIAMI 33166-2700		
OWNER/AUTHORIZED REPRESENTATIVE:MARTIN MARKSPHONE:Email:Mobile:CONTACT NAME:PHONE:Email:Mobile:			
ENTITLEMENT PERIOD	: 3/10/2008 / 3/9/2013 (effective date) (end date)		

Facility Section

PART I: INSPECTION CON	MPLIANCE STATUS (check 🗹 onl	y one box)
IN COMPLIANCE	MINOR Non-COMPLIANCE	SIGNIFICANT Non-COMPLIANCE

PA	ART II: <u>ONSITE INTRODUCTORY MEETING</u>	·	only one
1.	Name(s) of facility representative(s): <u>MARTIN MARKS</u>	box for each o	question)
	Brief Notes:		
2.	Is the Authorized Representative still MARTIN MARKS?	Xes Yes	□No
3.	If different, did the facility provide an administrative update within 30 days? Is the facility contact still ? If no, who is?:		□No □No
4.	Will facility be conducting VE test(s) during today's inspection?		□No □No

Emissions Unit Section <u>1-Relocatable Crusher</u>

(check 🗹	only one
box for each	question)

	box for each	n question)			
 Is the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Process {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the major is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Gra Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand a (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Roo (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Ch and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Bord and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Verm (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.} 1. Is the EU located at a fixed or portable nonmetallic mineral processing plant 	prity nite, nd Gravel; ck Salt; iloride, ax, Kernite,				
 a) the bolcate in a finite or pointer in the finite in problem g pinter or hot mix asphalt plant that has an above ground crusher or grinding mill?	🛛 Yes 🖾 Yes	⊠No □No □No			
 If answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to subpart OOO so skip the following questions and go directly to Question 24. If the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5. 5. Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or 					
 subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I? 6. Is the EU located at a fixed sand and gravel plant or crushed stone plant with a capacity less than or equal to 23 megagrams/hour (25 tons/hour)? 7. Is the EU located at a portable sand and gravel plant or crushed stone plant with a capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	🗌 Yes 🗌 Yes	□No □No □No □No			

9. Is the EU a wet screening operation or subsequent screening operation, bucket elevator or		
belt conveyor in a production line that processes saturated material up to the first crusher, grinding mill or storage bin in the production line?	Yes	No
<i>{Note: "wet screening operation" means a screening operation which removes unwanted material or</i>		NO
which separates marketable fines from the product by a washing process which is designed and operate	<i>pd</i>	
at all times such that the product is saturated with water. "Saturated material" means mineral material		
with sufficient surface moisture such that particulate matter emissions are not generated from processi		
of the material through screening operations, bucket elevators and belt conveyors. Material that is wett		
solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
$\int \mathcal{F} = \int \mathcal{F} = $		
10. Is the EU a screening operation, bucket elevator or belt conveyor in the production line		
downstream of wet mining operation that process saturated material up to the first crusher,		
grinding mill or storage bin in the production line?	Yes	No
<i>{Note: Wet mining operation means a mining or dredging operation designed and operated to extract</i>		
any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic		
mineral is saturated with water. "Saturated material" means mineral material with sufficient surface		
moisture such that particulate matter emissions are not generated from processing of the material		
through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by		
wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
If menues to some of the sin Questions 5, 10, shows in "Yes" that the EU is not subject to		
If answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to subpart OOO so skip the following questions and go directly to Question 24.		
If the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
If the answer to all of the six Questions 5-10 above is 100 then continue to Question 11.		
11. When was the EU last constructed, modified, or reconstructed?		
12. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	Yes	No
If answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures,		
Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes	No
If answer to Question 13 is "No" skip the following questions and go directly to Question 19		
14. Initial Tests: a. Was an initial PM stack test performed on the control device within 180 days of		
initial startup of the EU? N/A	Yes	□ No
b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	\Box Yes	\square No
c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	\square Yes	No
d. If yes, was the opacity less than or equal to 7% opacity?	Yes	No
15. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
individually in compliance with emissions limits:		
a. Was an initial PM stack test performed on each vent control device within 180 days of	_	_
initial startup of the EU? N/A	Yes	No No
$\{A \text{ "vent" is any opening through which there is mechanically induced air flow for the } A$		
purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
one or more affected EUs.}		
b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	Yes Ves	L.No
c. Was an initial VE test performed on fugitive emissions from non-vent building openings?	Yes Ves	L.No
d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	Yes	LNo

<u>1-Relocatable Crusher</u>

16.Is a baghouse used to control emissions from the EU?	Yes	No
If yes, the owner operator:		
uses a bag leak detection system specified in 40 CFR 60.674(d);		
follows the requirements of 40 CFR 63AAAAA Lime Manufacturin	ng	
as specified in 40 CFR 60.674(e); or		
none of the above (i.e., out of compliance)		
17. If the EU is an individual, enclosed storage bin controlled by a baghouse,		
were initial fugitive emissions less than or equal to 7% opacity? 🗌 N/A	Yes	No No
	_	_
18.Is a wet scrubber used to control emissions from the EU?	∐ Yes	L.No
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's		
instructions?	Yes	L.No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250		
pascals +1 inch water gauge pressure.}		
<i>and</i> b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the		
device has been calibrated on an annual basis in accordance with manufacturer's instructions ?		No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%		NO
of design scrubbing liquid flow rate. }		
of design servooning inquide now rate. j		
19. Is wet suppression used to control emissions from the EU?	T Yes	□No
If yes:		
a. Does the owner/operator perform monthly inspections to check that water is flowing to		
the discharge spray nozzles?		
b. Does the owner/operator initiate corrective action within 24 hours and complete		
corrective action as expediently as practical is water is not flowing properly?		
c. Is each inspection of the spray nozzles, including the date and any corrective action taken,		
recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?	Yes	No
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following		
questions and go directly to Question 24.		
20. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures,	—	—
Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	∐ Yes	L.No
21. Initial Tests:		
a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU? N/A	Yes	□ No
b. If yes, was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)?	Yes	\square No \square No
c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	\square No
d. If yes, was the opacity less than or equal to 7% opacity?	Yes	\square No

22. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
individually in compliance with emissions limits:		
a. Was an initial PM stack test performed on each vent control device within 180 days of initial startup of the EU? N/A	Yes	🗌 No
$\{A \text{ ``vent'' is any opening through which there is mechanically induced air flow for the }$		
purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
one or more affected EUs.}		
b. Was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)? c. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	Yes Yes	∐No ∏No
23. Is a wet scrubber used to control emissions from the EU?	Yes	No
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	□ Yes	□No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250 pascals +1 inch water gauge pressure.}		NO
and		
 b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and th device has been calibrated on an annual basis in accordance with manufacturer's instructions ? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.} 	e Yes	No
24. When was the last VE test conducted by the owner/operator for this EU? <u>10/21/2009</u>		
a. If EU is not subject to 40 CFR 60 subpart OOO, has the EU been tested within the past 5 years? b. If EU is subject to 40 CFR subpart OOO:	Yes	XNo
i. has the EU been tested during each of the past 4 calendar years?	T Yes	No
ii. has the EU been tested utiling each of the past realendar year?		No
25. Was a VE test conducted by the <i>owner/operator</i> for this unit during this site visit?	🛛 Yes	□No
a. Was the VE test conducted at a process rate that is representative of the normal rate? Rate:	\boxtimes Yes	
b. Was the VE test conducted according to EPA Method 9?	X Yes	□No
c. The VE test resulted in an opacity of $\underline{0}$ % for the highest six-minute average.	_	_
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	🛛 Yes	No
26. Was a VE test conducted by the <i>inspector</i> for this unit during this site visit?	Yes	XNo
a. Was the VE test conducted at a process rate that is representative of the normal rate?	Yes	No
Rate:		
b. Was the VE test conducted according to EPA Method 9?	Yes	No
c. The VE test resulted in an opacity of% for the highest six-minute average.	_	_
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	Yes	No
]
VE Opacity Limits		

VE Opacity Limits				
	EU not subject to 40 CFR 60 Subpart OOO	Subpart OOO EU constructed, modified, or reconstructed prior to 4/22/2008	Subpart OOO EU constructed, modified, or reconstructed on or after 4/22/2008	
Crusher with no capture system	20%	15%	12%	
All other affected EUs	20%	10%	7%	

<u>RI</u>	EASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check ☑ box for each	only one question)
1.	 Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined emissions by: a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? N/A If no, where are unconfined emissions occurring? 	🛛 Yes	🗌 No
	 b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A c) Paving and the sile has a sile has a sile basis of a sile	⊠ Yes □ Yes ⊠ Yes	□ No □ No □ No
	e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles? N/A	Xes Yes	🗌 No
2.	If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	Yes Yes	No No

CONFIRMATION OF GENERAL PERMIT ELIGIBILITY (check \square only one box for each question) 1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant? ----- Yes ...No b) 25 tons per year or more of any combination of hazardous air pollutants? ------ 🗍 Yes ...No c) 100 tons per year or more of any other regulated air pollutant? ------ TYes ...No 2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception of units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? ------ Yes X..No If YES, what non-exempt units or activities? b) any emissions units or activities authorized by another air general permit where such other air general permit and this general permit specifically allow the use of one another at the same facility? ----- Yes X..No If YES, what other general permit units or activities?

3.	Is the total combined annual facility-wide fuel usage of all plants less than or equal to:	
	a) 275,000 gallons of diesel fuel? Yes	.No
	b) 23,000 gallons of gasoline? Yes	.No
	c) 44 million standard cubic feet on natural gas? Yes	.No
	d) 1.3 million gallons of propane? Yes .	.No
	e) or an equivalent prorated amount if multiple fuels are used onsite (use equation below)? Yes	.No
() gal diesel/yr + () gal gasoline/yr + () MM SCF nat. gas/yr + () MM gal propane/yr $\leq 1.00?$	
27	75,000 gal diesel/yr 23,000 gal gasoline/yr 44 MM SCF nat. gas/yr 1.3 MM gal propane/yr	
4.	Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel consumption	
		.No

(SENERAL CONDITIONS	(check 🗹	only one
1	• Has the owner or operator allowed the circumvention of any air pollution control device, or	box for each question)	
	Allowed the emission of air pollutants without the proper operation of all applicable air		
_	pollution control devices?	∐ Yes	⊠No
	a) maintain the authorized facility in good condition?	- 🛛 Yes	No
	b) ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?	🛛 Yes	□No
3	• Has the owner or operator allowed you, as the duly authorized representative of the Department, acces		INO
	to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	- 🛛 Yes	No

	ELOCATABLE PLANT The facility: is stationary; is relocatable; or consists of both stationary and relocatable NMMP and/or concrete batching plants. (If only stationary, skip the following questions 2 and 3.)	(check 🗹 box for each	only one question)
2.	 For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900(to the Department or Local Air Program no later than five business days following relocation? 	5)]	⊠No ⊠No
3.	If the relocatable NMMP plant was co-located at a facility with a separate air construction or air opera permit, and the relocatable NMMP plant is <u>not</u> included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose? If YES, what was the purpose? {Note: crushing recycled asphalt pavement (rap) at an asphalt plant is considered routine and so therefore must be authorized in the facility's air construction or operation permit.}		□No
	 b) were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?	Yes Yes	□No □No

	HANGES dministrative Changes:	(check 🗹 box for each	only one question)		
1.	Were there any changes in the name, address, or phone number of the facility or authorized represent associated with a change in ownership or with a physical relocation of the facility or any emissions un				
	operations comprising the facility; or any other similar minor administrative change at the facility?	Yes	XNo		
2.	If YES, did the facility provide written notification within 30 days of the change?	Yes	L.No		
Ne	New or Modified Process Equipment or Change in Ownership:				
3.	Since the last registration form submittal has there been				
	a) Installation of any new process equipment?	🗌 Yes	🖾No		
	b) Alterations to existing process equipment without replacement?	🗌 Yes	🖾No		
	c) Replacement of existing equipment with equipment that is substantially different?	- 🗌 Yes	🖾No		
	d) A change in ownership?	🗌 Yes	🖾No		
4.	If the answer to any question 3a d. is YES, was a new registration form and the appropriate fee sul	omitted			
	30 days prior to the change?	🗌 Yes	No

COMMENTS: EUGENE SCHALTENBRAND AND WIFE PERFORMED FIVE (5) 30-MINUTES VISIBLE EMISSIONS TESTS ON THE PORTABLE CRUSHER AND ASSOCIATED EQUIPMENT. I DID NOT OBSERVE ANY VISIBLE EMISSIONS DURING THE TESTS. THE CRUSHER IS LOCATED AT NW 12 STREET AND 72 AVENUE. IT WILL BE AT THIS LOCATION FOR SEVERAL MONTHS.
