**COMMENTS:** The concrete batch plant was not operating during this inspection.

The plant uses electricity to power the batching process. Above ground diesel storage tanks are located at the site to provide fuel for trucks/ mobile sources. A large water tank truck is used to wet the roads and yard.

Water had been sprayed on the entrance road upon my arrival. Roads are not paved, and are periodically regraded.

Tons of materials used are logged daily; and they indicated they would begin adding monthly totals of materials used to their logs.

The authorized representative on file: James "Pat" Gemind is no longer with the company. Written notification of the new authorized representative is needed. The local facility contacts indicated our letter should be sent to E.K. "Skip" Edwards, President.
