COMMENTS: The facility was not in operation at the time of my visit. I spoke to Mr. David Kaufman, Mine Manager, on the telephone and he informed me that the mine closed in November 2008. I asked Mr. Kaufman what were the plans for the mine and he told me that it was hoped that when the economic situation improved that the mine would be able to reopen. I told Mr. Kaufman that the mine had a valid air permit and that if he intended to keep the permit in the hope that the mine would reopen in the future he should notified the Department of the mines current condition and asked that the facility be placed in an inactive status. I also told Mr. Kaufman that should the mine reopen it would be necessary that the crusher be retested for compliance within 30 days of its reactivation.
