COMMENTS: Joe Panetta and I performed an unannounced routine compliance inspection of this facility. We arrived on site at 1:25 pm and after waiting a few minutes we met with Cindy Reed. This site is a rental yard and crushing is not actually performed at this location. We told Cindy that we would like to confirm which units were on site and to verify the serial numbers on those units. Cindy told us that they only had two units on site at the time (units 7775502 and 7775508). Cindy led Joe and me around to the yard where the units are stored. As we approached the units a man who identified himself as the business owner interrupted the inspection. He was very angry and confrontational and questioned our presence at the office. He made several insulting remarks directed at the inspectors as well as at the Department. After about 10 minutes of questioning he allowed us to continue on with the inspection. The serial number on the first unit we checked was 73191. Our records indicate that unit has ARMS ID 7775508. Cindy the realized that 7775502 was not on site and was still in transit from SED.
