**Comments: Reviewed records for the months of 1/2010 to 7/1/2010 indicated the required revision requested by AQ Division office on 9/18/08 has not been implemented. I reminded Mr. Nichols that his facility was require to add (BaghouseVibrator operate) for at lease 15 minutes after the cement storage is loaded to the O&M records log. He stated he would make the revision to the O&M log ASAP and copy to Pinellas AQ Division office with ten working days. See attached O&M log sheets.**

**The emission unit has not begun operation. I informed Mr. Nichols he needs to perform VE test no later than 30 days after beginning operation. I was not able to perform visible emissions test, because no pneumatic loading of the silo at the time. He stated the last time they pneumatically loaded the silo was on 3/3/10. He stated the silo was loaded to test and mechanically fine tunes the emission unit. He stated their emission unit has not begun operation. Mr. Nichols stated their business has been very sluggish. He stated they hope to begin operation soon and the Visible Emission test will be conducted.**

**Exit Interview: I told Mr. Nichols to let me known when they plan to pneumatic loading the silo.**
