COMMENTS: This inspection was conducted in conjunction with the hazardous waste section. Facility is not currently operating the perc machines. The hazardous waste inspector had previously informed Ms. Patel the perc left in the machine needed to be removed. At the time of the inspection there was still perc in the machines. The owner only moved the perc from the 1^{st} and 2^{nd} chambers into the 3rd chamber. Owner was adivsed to keep of record of the timespan machines are out of operation. There were several container used to collect muck that were open to the atmosphere and contained small amounts of muck. Owner was instructed to properly cover containers and properly dispose of muck within 7 days. The muck was disposed of and the containers were properly sealed -verified by visual inspection on 03/26/09. It was also noted during the inspection that the floor surrounding the dry cleaning area was not properly sealed. However, due the machines not being in operation at the time of the inspection, the owner was told she did not have to seal the floors within the 7 day corrective action time period, but she would have to seal the floors immediately upon the perc machines being returned to service.
