COMMENTS: I met with Mark Schabes, the brother of Robert Schabes, because Robert was not there at the time of this inspection. Mark is the Director of Marketing for the company but is also in charge of the generator's maintenance. Mark stated that they test it every month by turning it on and run it for 20 minutes to make sure its still working. The last time is was tested and inspected was in June of this year. Mark also showed me records or the fuel usage and the inspection records. The fuel usage was below 100 gallons and the inspection records showed that it was inspected by their staff on a monthly basis. Mark also told me that every that Teco uses it every now and then when their demand goes up, but its only for a couple of hours at a time. The emergency generator has never operated for a 24 hour period. It is still in brand new condition.
