COMMENTS: Ilka Bundy met with Bruno Ferraro, consultant for Grove Scientific and Engineering, and Pete Piacenti, owner of Mobile Mix Masters, on December 8, 2011, to audit the compliance test on the cement silo. The cement tanker arrived 30 minutes late. The loading process began at 9:35 AM and ended at 10:34 AM. The loading rate was 25.9 TPH. No visible emissions were observed. This facility does not have a weigh hopper/batcher. The material is loaded onto trucks and mixes the product on site. Pete Piacenti stated he has the yard swept twice a week. Due to the small size of the property, dirt accumulates on the paved areas. The facility is currently looking for a larger facility to operate out of due to the size of their current location.
