COMMENTS: In a compliance inspection conducted 9/28/2012, AQD staff (E. Susky) observed operations at Roscioli Yachting Center. Mr. John Slade accompanied staff on the inspection. The facility is a marina with dockage, painting sheds, yard area and offices. Houskeeping was observed to be very good this year. The facility makes an effort to adhere to the Marina Best Management Practices (BMPs). Ms. LoGiudice submitted VOC records to the department. On 10/15/2012, AQD staff spoke to Ms. LoGiudice regarding the records as it looked that the 44lbs/VOC had been violated. However, there was an error with regards to the proper measurements used (quarts not gallons) and the facility has not violated its permit (total highest VOC is 25.85 per day). The facility will need to keep a watch on its resin usage.
