COMMENTS: On February 29, 2012 I visited this facility to conduct the annual compliance inspection. On site I met Alexander Colon, the owner of the facility. The Chromium tank with a capacity of 900 gallons is located at the 14 spot and it was operating. The owner mentioned that he adds wetting agent every three months to neutralize the fumes and also adds the agent when it is necessary. I emphasized to keep the record of surface tension.
