COMMENTS: On September 27, 2013 I visited this facility to conduct the annual compliance inspection. On site I met Alexander Colon, the owner of the facility. The Chromium tank with a capacity of 900 gallons is located at the fourteen (14) spot and it is operational. Mr. Colon mentioned that he uses for Chromium dipping for five(5) seconds at a time for three(3) to four(4) times per week. Furthermore, he adds wetting agent every three months to neutralize the fumes and also adds the agent as needed. A verbal warning was given for not keeping the record of surface tension.
