thanks, but on that day when i was a lemon bay animal hospital, next door, the smell was horrible and you could see heat coming out of their smoke stack, so they were burning something and it wasn't trash, i know what i saw and smelled, so someone is not telling the truth.

Mr. Webber,

I investigated your complaint of terrible odors coming from the Englewood Community

Funeral Home at 3070 S. McCall Rd on June 28. At the time of the inspection, the facility's crematory

was not in operation. A review of the facility's operation logs show that on the date that

you indicate was last Friday in your e-mail received on June 27 by Rhonda Hughes of our Tampa Air Section

Office would have been June 22, 2012. On that Friday, the operation logs of the

facility indicate that the facility did not perform any cremations on this day. Also a review of the

facility's records show no malfunctions or problems with the crematory unit.

If you have any questions or any other complaints please call the Department at (239) 344-5600.

Thank you.

Robert J. Stewart
