COMMENTS:

Initial Inspection. Newly permitted facility. Provided owners with template for VOC logging. Owners stated that their styrene usage is below 76,000 pounds annually. Will return within (2) months to ensure that the facility has implemented VOC-logging procedures as instructed. Provided bill for 2009 Palm Beach County License Fee via e-mail on 10/28/09. Instructed owners to contact the PBCHD Haz Waste section to inquire as to whether the facility qualified for a HAZ Waste Permit. Facility in satisfactory condition. Strong styrene odors presint off-site, not detected outside of the facility. Satisfactory initial compliance inspection.
