## NON-METALLIC MINERAL PROCESSING PLANTS

## COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE:	ANNUAL (INS1, INS2)			Y (CI)	
	RE-INSPECTION (FUI)	ARMS COMPL	AINT NO:		
AIRS ID#: 7775649 DA	TE: <u>05/8/2012</u>	ARRIVE: <u>1000</u>		DEPART: <u>1230</u>	
FACILITY NAME: MA	ARINA MILE PARK				
FACILITY LOCATION	N: MARINA RD				
	DANIA BEACH	33312			
OWNER/AUTHORIZE Email:	D REPRESENTATIVE:	CHARLES GUSMANO	PHONE: Mobile:	(561)582-6688	
CONTACT NAME: B Email:	BRAD AMUNDSON		PHONE: Mobile:	(954)583-7973 (954)214-6063	
ENTITLEMENT PERI	<b>OD:</b> 10/16/2010 / 10/ (effective date) (end d	(16/2015 late)			

## **Facility Section**

PART I: INSPECTION COM	<b>IPLIANCE STATUS</b> (check <b>D</b> only <b>o</b>	one box)
IN COMPLIANCE	MINOR Non-COMPLIANCE	SIGNIFICANT Non-COMPLIANCE

PA	ART II: <u>ONSITE INTRODUCTORY MEETING</u>	(check 🗹	2
1.	Name(s) of facility representative(s):	box for each	question)
	Brief Notes:		
2.	Is the Authorized Representative still CHARLES GUSMANO?	Xes Yes	No
3.	If different, did the facility provide an administrative update within 30 days? Is the facility contact still BRAD AMUNDSON?	☐ Yes ✓ Yes	□No □No
4.	Will facility be conducting VE test(s) during today's inspection?		□No □No

<b>Emissions Unit Section</b>	
1 -NMMP Plant-crusherw/screen,cap250T/hr450HpdieselRICEspraba	rs

1. 2. 3.	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processin         {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majori         is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granit         Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and         (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock.         (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo         and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax,         and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice         (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.]         Is the EU located at a fixed or portable nonmetallic mineral processing plant         or hot mix asphalt plant that has an aboveground crusher or grinding mill?	ty Gravel; Salt; ride, Kernite,	⊠No □No □No □No
su If 5.	undersize material through one or more mesh surfaces (screens) in series, and retaining oversize material on the mesh surfaces. Grizzly feeders associated with truck dumping and static (non-moving) grizzlies used anywhere in the nonmetallic mineral processing plant are not considered to be screening operations.) building enclosing any of the above EUs if all enclosed EUs are not individually in compliance with emissions limits. <i>{A "vent" is any opening through which there is mechanically induced air flow for the purpose of exhausting from a building air carrying particulate matter (PM) emissions from one or more affected EUs.}</i> answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5. Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	□ Yes □ Yes	⊠No ⊠No
7.	Is the EU located at a portable sand and gravel plant or crushed stone plant with a capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	Yes	No
8.	Is the EU located at a common clay plant or pumice plant with capacity less than or equal to 9 megagrams/hour (10 tons/hour) ?	Yes	⊠No

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or belt conveyor in a production line that processes saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?		Yes	□No
	<i>{Note: "wet screening operation" means a screening operation which removes unwanted material or</i>		105	
	which separates marketable fines from the product by a washing process which is designed and operate	d		
	at all times such that the product is saturated with water. "Saturated material" means mineral material			
	with sufficient surface moisture such that particulate matter emissions are not generated from processing	g		
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wette	ed		
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
10	Is the EU ascreaming operation, bucket elevator or belt conveyor in the production line			
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line downstream of wet mining operation that process saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?		Yes	□No
	grinding min of storage on in the production mie.		105	
	<i>{Note: Wet mining operation means a mining or dredging operation designed and operated to extract</i>			
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic			
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface			
	moisture such that particulate matter emissions are not generated from processing of the material			
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by			
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
If	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to			
	bpart OOO so skip the following questions and go directly to Question 24.			
	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.			
11	. When was the EU last constructed, modified, or reconstructed?			
11	. When was the EO fast constructed, mounted, of reconstructed.			
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?		Yes	□No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20			
13	. Does the EU have a particulate matter capture system (equipment including enclosures,			
	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	No
lf	answer to Question 13 is "No" skip the following questions and go directly to Question 19			
14	. Initial Tests:			
	a. Was an initial PM stack test performed on the control device within 180 days of			
	initial startup of the EU? N/A		Yes	🗌 No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?		Yes	No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Ц	Yes	L.No
	d. If yes, was the opacity less than or equal to 7% opacity?		Yes	No
15	. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not			
10	individually in compliance with emissions limits:			
	a. Was an initial PM stack test performed on each vent control device within 180 days of			
	initial startup of the EU? N/A		Yes	🗌 No
	$\{A  ``vent'' is any opening through which there is mechanically induced air flow for the $			
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from			
	one or more affected EUs.}		<b>N</b> 7	
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?		Yes	L.No
	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?	H	Yes Yes	□No □No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	$\Box$	1 68	NO

16. Is a baghouse used to control emissions from the EU?	Yes	No
If yes, the owner operator: Conducts quarterly 30-minute VE tests using Method 22;		
uses a bag leak detection system specified in 40 CFR 60.674(d);		
follows the requirements of 40 CFR 63AAAAA Lime Manufacturir	ισ	
as specified in 40 CFR 60.674(e); or	15	
$\square$ none of the above (i.e., out of compliance)		
inone of the above (i.e., out of comphance)		
17. If the EU is an individual, enclosed storage bin controlled by a baghouse,		
were initial fugitive emissions less than or equal to 7% opacity? N/A	T Yes	□ No
18. Is a wet scrubber used to control emissions from the EU?	Yes	No
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's		
instructions?	Yes	No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250		
pascals +1 inch water gauge pressure.}		
and		
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the		
device has been calibrated on an annual basis in accordance with manufacturer's instructions ?	Yes	No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%		
of design scrubbing liquid flow rate. }		
of design serubbing inquid now rate.		
19.Is wet suppression used to control emissions from the EU?	Yes	□No
If yes:		
a. Does the owner/operator perform monthly inspections to check that water is flowing to		
the discharge spray nozzles?		
b. Does the owner/operator initiate corrective action within 24 hours and complete		
corrective action as expediently as practical is water is not flowing properly?		
c. Is each inspection of the spray nozzles, including the date and any corrective action taken,		
recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?		□No
recorded in the written of electronic logbook as required by 40 CFK 00.070(0)?		
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following		
questions and go directly to Question 24.		
questions and go allectry to Question 24.		
20. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures,		
Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		□No
ribbus, rans, dampers, etc.) to capture and transport particulate matter to a control device.		
21. Initial Tests:		
a. Was an initial PM stack test performed on the control device within 180 days of		
initial startup of the EU? N/A	Yes	□ No
b. If yes, was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)?	Tes Yes	$\square$ .No
c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	$\square$ Yes	$\square$ No
d. If yes, was the opacity less than or equal to 7% opacity?	Yes	$\square$ No
a. If yos, was the opacity loss than of equal to 7/0 opacity:		

22. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
individually in compliance with emissions limits:		
a. Was an initial PM stack test performed on each vent control device within 180 days of	<b>—</b> ••	
initial startup of the EU? N/A		es 🗌 No
$\{A \text{ "vent" is any opening through which there is mechanically induced air flow for the } A$		
purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
one or more affected EUs.}	_	_
b. Was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)?		
c. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?		esNo
23. Is a wet scrubber used to control emissions from the EU?	□ Y€	es 🗌No
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's		
instructions?		es 🗌No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250	_	_
pascals +1 inch water gauge pressure.}		
and		
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the	е	
device has been calibrated on an annual basis in accordance with manufacturer's instructions ?		es 🗌No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%		
of design scrubbing liquid flow rate. }		
or design berubbing inquite now rate.		
24. When was the last VE test conducted by the owner/operator for this EU? 6/16/11		
a. If EU is not subject to 40 CFR 60 subpart OOO, has the EU been tested within the past 5 years?	X Ye	es 🗌No
b. If EU is subject to 40 CFR subpart OOO:		
i. has the EU been tested during each of the past 4 calendar years?	X Ye	es 🗌No
ii. has the EU been tested yet within the current calendar year?	X Ye	_
25. Was a VE test conducted by the <i>owner/operator</i> for this unit during this site visit?	X Ye	es 🗌No
a. Was the VE test conducted at a process rate that is representative of the normal rate?	X Ye	
Rate:		
b. Was the VE test conducted according to EPA Method 9?	X Ye	es 🗌No
c. The VE test resulted in an opacity of $0.0\%$ for the highest six-minute average.		
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	X Ye	esNo
26. Was a VE test conducted by the <i>inspector</i> for this unit during this site visit?		es 🛛No
a. Was the VE test conducted at a process rate that is representative of the normal rate?		
Rate:		
b. Was the VE test conducted according to EPA Method 9?	□ Y€	es 🗌No
c. The VE test resulted in an opacity of% for the highest six-minute average.		
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	□ Y€	es 🗌No
a. Die die 12 lost demonstrate compliance with the opacity mint. (See chart below).		

<b>Emissions Unit Section</b>
2-NMMP Plant-RICE diesel pwr unit 450 Hp for crusher/screener

	(check 🗹	only one
1	box for each	question)
Is the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processin {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majorit is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granit Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock ( 5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermic (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	ty e, Gravel; Salt; ride, Kernite,	
1. Is the EU located at a fixed or portable nonmetallic mineral processing plant	<b>—</b>	<b>N</b>
or hot mix asphalt plant that has an aboveground crusher or grinding mill? 2. Is the EU located above ground (i.e., not in an underground mine)?	∐ Yes ⊠ Yes	⊠No □No
<b>3.</b> Was the EU constructed, modified, or reconstructed after August 31, 1983?	$\boxtimes$ Yes	$\square$ No
4. Is the EU one of the following?	$\boxtimes$ Yes	No
<ul> <li>crusher, grinding mill, bucket elevator, belt conveyor, bagging operation, storage bin, enclosed truck loading station enclosed railcar loading station; crusher or grinding mill at hot mix asphalt plant that reduces the size of nonmetallic minerals embedded in recycled asphalt pavement or subsequent emissions unit up to, but not including, the first storage silo or bin; screening operation (a device for separating material according to size by passing undersize material through one or more mesh surfaces (screens) in series, and retaining oversize material on the mesh surfaces. Grizzly feeders associated with truck dumping and static (non-moving) grizzlies used anywhere in the nonmetallic mineral processing plant are not considered to be screening operations.)</li> <li>building enclosing any of the above EUs if all enclosed EUs are not individually in compliance with emissions limits. <i>{A "vent" is any opening through which there is mechanically induced air flow for the purpose of exhausting from a building air carrying particulate matter (PM) emissions from one or more affected EUs.}</i></li> <li>If answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to subpart OOO so skip the following questions and go directly to Question 24.</li> <li>If the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.</li> </ul>		
5. Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process		
any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	Yes	No
6. Is the EU located at a fixed sand and gravel plant or crushed stone plant with a		_
<ul><li>capacity less than or equal to 23 megagrams/hour (25 tons/hour)?</li><li>7. Is the EU located at a portable sand and gravel plant or crushed stone plant with a</li></ul>	Yes	No
capacity less than or equal to 136 megagrams/hour (150 tons/hour) ?	Yes	No
8. Is the EU located at a common clay plant or pumice plant with capacity less than or equal to 9 megagrams/hour (10 tons/hour) ?	Yes	No

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or belt conveyor in a production line that processes saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?		Yes	□No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or which separates marketable fines from the product by a washing process which is designed and operated at all times such that the product is saturated with water. "Saturated material" means mineral material with sufficient surface moisture such that particulate matter emissions are not generated from processin of the material through screening operations, bucket elevators and belt conveyors. Material that is wetter solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}	g		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line downstream of wet mining operation that process saturated material up to the first crusher, grinding mill or storage bin in the production line?		Yes	No
	{Note: Wet mining operation means a mining or dredging operation designed and operated to extract any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic mineral is saturated with water. "Saturated material" means mineral material with sufficient surface moisture such that particulate matter emissions are not generated from processing of the material through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
su	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.			
11	. When was the EU last constructed, modified, or reconstructed?			
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?		Yes	No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20			
13	<b>.Does the EU have a particulate matter</b> <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	No
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19			
14	.Initial Tests:			
	a. Was an initial PM stack test performed on the control device within 180 days of	_		<b>—</b>
	initial startup of the EU? N/A b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?		Yes	
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	_	Yes Yes	∐No □No
	d. If yes, was the opacity less than or equal to 7% opacity?	=	Yes	No
15	. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not

{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%		NO
of design scrubbing liquid flow rate. }		
of design serubbing inquid now rate.		
24. When was the last VE test conducted by the owner/operator for this EU? 6/16/11		
a. If EU is not subject to 40 CFR 60 subpart OOO, has the EU been tested within the past 5 years?	Xes Yes	No
b. If EU is subject to 40 CFR subpart OOO:	_	_
i. has the EU been tested during each of the past 4 calendar years?	Yes	No
ii. has the EU been tested yet within the current calendar year?	Yes	No
	_	_
25. Was a VE test conducted by the <i>owner/operator</i> for this unit during this site visit?	Yes Yes	L.No
a. Was the VE test conducted at a process rate that is representative of the normal rate?	🛛 Yes	LNo
Rate:		
b. Was the VE test conducted according to EPA Method 9?	Yes Yes	LNo
c. The VE test resulted in an opacity of $0.0\%$ for the highest six-minute average.		
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	∐ Yes	LNo
26. Was a VE test conducted by the <i>inspector</i> for this unit during this site visit?	☐ Yes	XNo
a. Was the VE test conducted by the <i>unspector</i> for this unit during this site visit:	Tes Yes	$\square$ No
Rate:		
b. Was the VE test conducted according to EPA Method 9?	T Yes	□No
c. The VE test resulted in an opacity of% for the highest six-minute average.		
d. Did the VE test demonstrate compliance with the opacity limit? (See chart below)	Yes	□No

VE Opacity Limits			
	EU not subject to 40 CFR 60 Subpart OOO	Subpart OOO EU constructed, modified, or reconstructed prior to 4/22/2008	Subpart OOO EU constructed, modified, or reconstructed on or after 4/22/2008
Crusher with no capture system	20%	15%	12%
All other affected EUs	20%	10%	7%

<u>RI</u>	EASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check 🗹 box for each d	only one question)
1.	<ul> <li>Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined emissions by:</li> <li>a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? N/A</li> <li>If no, where are unconfined emissions occurring?</li> </ul>	🛛 Yes	🗌 No
	<ul> <li>b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A</li> <li>c) Paving and maintaining roads and parking areas? N/A</li> <li>d) Removal of particulate matter from roads and other paved areas under control of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A</li> </ul>	⊠ Yes ⊠ Yes	□ No □ No
	e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles?	Yes	No
2.	If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	☐ Yes ☐ Yes	⊠ No □No

## **CONFIRMATION OF GENERAL PERMIT ELIGIBILITY** (check $\square$ only one box for each question) 1. Does this facility keep records to show that it does not have the potential to emit: 🖾..No a) 10 tons per year or more of any hazardous air pollutant? ----- Yes b) 25 tons per year or more of any combination of hazardous air pollutants? ------X..No c) 100 tons per year or more of any other regulated air pollutant? ------ TYes X..No 2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception of units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? ------ Yes X..No If YES, what non-exempt units or activities? b) any emissions units or activities authorized by another air general permit where such other air general permit and this general permit specifically allow the use of one another at the same facility? ----- Yes X..No If YES, what other general permit units or activities?

3.	Is the total combined annual facility-wide fuel usage of all plants less than or equal to:			
	a) 275,000 gallons of diesel fuel? Xes	No		
	b) 23,000 gallons of gasoline? Xes [	No		
	c) 44 million standard cubic feet on natural gas? Yes	No		
	d) 1.3 million gallons of propane? Yes	No		
	e) or an equivalent prorated amount if multiple fuels are used onsite (use equation below)? Yes	No		
(	$\frac{() \text{ gal diesel/yr} + () \text{ gal gasoline/yr} + () \text{ MM SCF nat. gas/yr} + () \text{ MM gal propane/yr} \le 1.00?}{275,000 \text{ gal diesel/yr}}$ $\frac{() \text{ MM gal propane/yr}}{23,000 \text{ gal gasoline/yr}} \le 44 \text{ MM SCF nat. gas/yr}$ $\frac{() \text{ MM gal propane/yr}}{1.3 \text{ MM gal propane/yr}} \le 1.00?$			
4.	Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel consumption for each consecutive 12-period for the past 5 years? Xear Yes	∃No		

G	ENERAL CONDITIONS	(check 🗹	
1.	Has the owner or operator allowed the circumvention of any air pollution control device, or	box for each	question)
	Allowed the emission of air pollutants without the proper operation of all applicable air		
2.	pollution control devices? Does the owner or operator:	Yes	⊠No
	a) maintain the authorized facility in good condition?	- 🛛 Yes	No
3.	<ul> <li>b) ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?</li> <li>Has the owner or operator allowed you, as the duly authorized representative of the Department, acces</li> </ul>		No
	to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	- 🛛 Yes	No

	ELOCATABLE PLANT         The facility:       is stationary;         X       is relocatable; or       consists of both stationary and relocatable         NMMP and/or concrete batching plants.       (If only stationary, skip the following questions 2 and 3.)	(check ☑ box for each	only one question)
2.	<ul> <li>For a relocated NMMP plant:</li> <li>a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location?</li> <li>b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900(o to the Department or Local Air Program no later than five business days following relocation?</li></ul>	5)]	□No □No
3.	If the relocatable NMMP plant was co-located at a facility with a separate air construction or air opera permit, and the relocatable NMMP plant is <u>not</u> included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose?		⊠No
	<ul> <li>b) were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?</li> <li>If YES, were any periods more than 6 months in any consecutive 12-month period?</li> </ul>	Yes Yes	□No □No

CHANGES Administrative Changes:	(check ☑ box for each	only one question)
1. Were there any changes in the name, address, or phone number of the facility or authorized reassociated with a change in ownership or with a physical relocation of the facility or any emity operations comprising the facility; or any other similar minor administrative change at the factor of the facility of the factor of the facility of the facil	ssions units or cility? 🗌 Yes	XNo
<b>2.</b> If YES, did the facility provide written notification within 30 days of the change? New or Modified Process Equipment or Change in Ownership:	Yes	No
<ul> <li>3. Since the last registration form submittal has there been <ul> <li>a) Installation of any new process equipment?</li> <li>b) Alterations to existing process equipment without replacement?</li> <li>c) Replacement of existing equipment with equipment that is substantially different?</li></ul></li></ul>	Yes Yes Yes te fee submitted	⊠No ⊠No ⊠No □No
