COMMENTS: Met on site with funeral director and reviewed paperwork in office. Facility is keeping track of all cremations properly. All paperwork was readily available and organized. Went out to inspect crematory at back of property. Building was neat and organized, no fugitive emissions or objectionable odors were noticed. All temperature charts were stored in crematory building. Inspection of temperature charts indicated that cremations were being performed with secondary combustion zone temperatures above the required minimum of 160 degrees fahrenheit at all times.
