Mr. Jim Forbes Regional Environmental Director Lafarge Building Materials, Inc. 12735 Morris Road Extension Suite 300 Alpharetta, Georgia 30004

Dear Mr. Forbes:

On July 17, 2009, a Department representative with the Air Resource Management Program inspected your facility, ID 0330070. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was in compliance at the time of the inspection for those sources specifically listed on the inspection report.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact Jennifer Waltrip at 850/595-8300, extension 1222 or Jennifer.Waltrip@dep.state.fl.us.

Sincerely,

Erica Mitchell

Stack Emissions 1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (Ref.: Chapter 62-297, F.A.C.)?

PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)	
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.) 1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.) Yes	□ No
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 2. Did this facility demonstrate: a) initial compliance no later than 30 days after beginning operation?	
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to the AGP Notification form submission, and within 60 days prior to each anniversary date?	□ No
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.) 4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the test was completed?	□ No
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))	
 (check ☑ appropriate box(es)) Is this facility: 1) a stationary ☑; 2) a relocatable ☐; or does it have: 3) both, stationary and relocatable ☐ concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ☑ only one box.</i>) If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)————————————————————————————————————	No No No No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414(2)(a) and (b), F.A.C. (continued)		
(check ☑ appropriate box(es))		
 paving and maintenance of roads, parking are application of water or environmentally safe of emissions? removal of particulate matter from roads and re-entrainment, and from building or work are reduction of stock pile height, or installation of particulate matter from stock piles? 	ant take reasonable precautions to control unconfined and yards, which shall include one or more of the following: eas, stock piles, and yards?	
PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-210.300(4)(d)4., F.A.C.		
A. New or Modified Process Equipment	<u>ES</u> – Kuie 02-210.500(4)(u)4., r.A.C.	
1. Since the last inspection has there been		
a) installation of any new process equipment?		
b) alterations to existing process equipment without	out replacement?	
c) replacement of existing equipment substantially different than that noted on the most recent notification form?		
d) If you answered YES to any of the above, did	the owner submit a new and complete	
notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or local program office? Yes No		
local program office.

Inspector's Signature	Approximate Date of Next Inspection	
<u> </u>		
COMMENTS: Department personnel conducted an unanno the Lafarge facility located in Escambia County. Mr. Danny	ounced annual air program compliance inspection on July 17, 2009 at Byrd was present to assist during the inspection.	
	on. There are three storage silos onsite for cement, flyash, and slage. r for the silos and truck batching process. The drop point where the	
trucks load the concrete also has a shoot and partial enclosure		
The word is neved to help control fractive emissions. Evolutive emissions from the steelmiles are controlled by steeling them within		

The yard is paved to help control fugitive emissions. Fugitive emissions from the stockpiles are controlled by storing them within three walls which are connected to a sprinkler system.

The most recent annual visible emissions ("VE") test was conducted on June 12, 2009. Results of the test showed no excess emissions, however, the test results submitted to the Department indicated that the batching operation was not active during the test. Please note that batching is required to occur during future test reports. Rule 62-296.414(3)(c), Florida Administrative Code states that if emissions from the weigh hopper (batcher) operation are also controlled by the silo dust collector, the batching operation shall be in operation during the visible emissions test... each test report shall state the actual silo loading rate during emissions testing and, if applicable, whether or not batching occurred during emissions testing.
