By Electronic Mail, Received Receipt Requested stephen.simonsen@lafarge-na.com

Mr. Stephen Simonsen Regional Environmental Manager Lafarge Building Materials, Inc. 12735 Morris Road Extension Alpharetta, Georgia 30004

Dear Mr. Simonsen:

On May 4, 2011, a Department representative with the Air Resource Management Program inspected your facility, ID 0330070. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was in compliance at the time of the inspection for those items specifically noted in the inspection report.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact Jennifer Waltrip at 850/595-0662 or jennifer.waltrip@dep.state.fl.us.

Sincerely,

Carre Melton

Carol Melton Air Compliance Supervisor

Facility Section (continued)

CONFIRMATION OF GENERAL PERMIT ELIGIBILITY	(check \square only one box for each question)
 Does this facility keep records to show that it does not have the potential to emit: a. 10 tons per year or more of any hazardous air pollutant? b. 25 tons per year or more of any combination of hazardous air pollutants? c. 100 tons per year or more of any other regulated air pollutant? 	🖾 Yes 🗌 No
 Does this facility include: a. Any emission units or activities not covered by the applicable air general permit (with the e units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3 Rule 62-4.040, F.A.C.)? If YES, what non-exempt units or activities? 	3) or
b. Any emissions units or activities authorized by another air general permit where such other permit and this general permit specifically allow the use of one another at the same facility? - If YES, what other general permit units or activities?	
3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a. 275,000 gallons of diesel fuel?	YesNoYesYesNoYesYesNoYesYesNoYesYesNogal propane/yr $\leq 1.00?$
4. Has the owner/operator maintained, available for inspection, site-wide records of monthly fue for each consecutive 12-period for the past 5 years?	

GENERAL CONDITIONS	(check 🗹 box for each	•
1. Has the owner or operator allowed the circumvention of any air pollution control device, or allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	🗌 Yes	🖂 No
2. Does the owner or operator:a. Maintain the authorized facility in good condition?b. Ensure that the facility maintains its eligibility to use the air general permit and complies with all	- Xes	□ No
terms and conditions of the air general permit?		🗌 No
to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	🛛 Yes	🗌 No

ELOCATABLE PLANT: Is the facility: stationary ; relocatable ; or consisting of both stationary and relocatable		(check 🗹 only one box for each question)	
concrete batching and/or nonmetallic mineral processing plants? (If only stationary, skip the following	ng question 2.))	
 Is the relocatable concrete batching plant used to mix cement and soil for onsite soil augmentation or stabilization?	🗌 Yes	🗌 No	
 a. Did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b. Did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900] 	6)]	🗌 No	
to the Department or Local Air Program no later than five husiness by the business of the business of the business of the business of the business days prior to relocation?		No No	
3. If the relocatable plant was co-loc a facility with a separate air construction or air operation per and the relocatable batch plant is not included as an emissions unit in that separate permit: a. Was the relocatable batch plant being used for a non-routine purpose (i.e, there is no repeated usage If YES, what was the purpose? 		🗌 No	
 b. Were records kept by the owner/operator to indicate how long it was co-located at the permitted facility? If YES, were any periods more than 6 months in duration? 		□ No □ No	
CHANGES	(check ☑ box for each	•	
 <u>Administrative Changes</u>: 1. Were there any changes in the name, address, or phone number of the facility or authorized representa associated with a change in ownership or with a physical relocation of the facility or any emissions un operations comprising the facility; or any other similar minor administrative change at the facility?	hits or Yes Yes Yes Yes	No No No No	
 c. Replacement of existing equipment with equipment that is substantially different?	🗌 Yes	⊠ No ⊠ No	
30 days prior to the change?	🗌 Yes	No No

COMMENTS: A Department representative conducted an unannounced annual air program compliance 2011 at Lafarge located in Escambia County. Mr. James Billhimer was present to assist during the inspe		n May 4,	

To prevent fugitive emissions, the site is paved and the yard is swept or watered down as needed. Aggregate is stored in three-sided concrete wind breaks with sprinklers. The facility operates on electricity, so there are no fuel requirements. The site and facility appeared well maintained. Logs of weekly dust collector inspections and any repairs made were available for review.

The most recent visible emission test was performed on June 11, 2010. No emissions were noted. The report did not include information as to whether the batching operation was in operation during the test. This information was obtained via email following review of the visible emission test report. As a reminder, Rule 62-296.414(3)(c), Florida Administrative Code states if emissions from the weigh hopper (batcher) operation are also controlled by the silo dust collector, the batching operation shall be in operation during the visible emissions test. The batching rate during the emissions test shall be representative of the normal batching rate and duration. Each test report shall state the actual silo loading rate during emissions testing and, if applicable, whether or not batching occurred during emissions testing.
