| #6                      | Solvent-based Rotogravure or<br>Flexographic           | 100,000 lbs*                       | 11,765 gals**                                                                                                                                      |

(<u>Example</u>: If you were a printer and your combination printing processes included both <u>Printing Process</u> numbers two (2) and five (5), then the most stringent limit shall apply to the total of all solvent-containing material used. In this example, the individual <u>Stringent Limit for Combinations (SLC)</u> for each process is 14,250 gals. and 47,059 gals., respectively. Therefore, the most stringent limit for this combination would be 14, 250 gals.)

6. Does the facility cause, suffer, allow or permit the discharge of air pollutants which cause or contribute to an objectionable odor? (Rule 62.296.320(2), F.A.C.)------ □Yes ⊠ No □ N/A
