COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2)					
AIRS ID#: 7775688 DATE: <u>3/19/2013</u> ARRIVE: <u>12:08 PM</u> DEPAR	T: <u>12:15 PM</u>				
FACILITY NAME: CIMABIAN SITE					
FACILITY LOCATION: 12100 NW 25 Street					
MIAMI 33182					
OWNER/AUTHORIZED REPRESENTATIVE: STEPHEN SOWARDS* Email: ssowards@blanchardmachinery.com CONTACT NAME: Email: PHONE: Email: Mobile: ENTITLEMENT PERIOD: 8/29/2011 / 8/29/2016 (effective date) (end date)					
Facility Section PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box)					
I ART 1: <u>INSTECTION COMPLIANCE STATES</u> (CHECK ☑ OIII) OHE BOX) SIGNIFICANT Non-COMPLIANCE SIGNIFICANT Non-COMPLIANCE					
DADT II. ONGITE INTRODUCTORY MEETING					
PART II: ONSITE INTRODUCTORY MEETING 1. Name(s) of facility representative(s): Brief Notes:	(check ☑ only one box for each question)				
2. Is the Authorized Representative still STEPHEN SOWARDS*?	- YesNo				
If different, did the facility provide an administrative update within 30 days? 3. Is the facility contact still? If no, who is?:	YesNo YesNo				
4. Will facility be conducting VE test(s) during today's inspection?					

Emissions Unit Section 1 –NMMP Plant-jaw crusher, 350 T/hr

		(check 🗹	only one
	b	ox for each o	question)
<u>Is</u>	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processing (Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majority is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granity Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock Stone, Granity (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlorand Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.)	g Plants? y e, Gravel; Salt; ride, Kernite,	,
1.	Is the EU located at a fixed or portable nonmetallic mineral processing plant		_
_	or hot mix asphalt plant that has an aboveground crusher or grinding mill?	∐ Yes	∐No
	Is the EU located above ground (i.e., not in an underground mine)?	☐ Yes ☐ Yes	∐No □No
	Is the EU one of the following?	Yes	□No
•	crusher, grinding mill, bucket elevator, belt conveyor, bagging operation, storage bin, enclosed truck loading station enclosed railcar loading station; crusher or grinding mill at hot mix asphalt plant that reduces the size of nonmetallic minerals embedded in recycled asphalt pavement or subsequent emissions unit up to, but not including, the first storage silo or bin; screening operation (a device for separating material according to size by passing undersize material through one or more mesh surfaces (screens) in series, and retaining oversize material on the mesh surfaces. Grizzly feeders associated with truck dumping and static (non-moving) grizzlies used anywhere in the nonmetallic mineral processing plant are not considered to be screening operations.) building enclosing any of the above EUs if all enclosed EUs are not individually in compliance with emissions limits. {A "vent" is any opening through which there is mechanically induced air flow for the purpose of exhausting from a building air carrying particulate matter (PM) emissions from one or more affected EUs.}		
su	answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.		
5.	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process	□ Vac	□ No
6.	any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	∐ Yes	□No
	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	☐ Yes	□No
	Is the EU located at a portable sand and gravel plant or crushed stone plant with a capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	☐ Yes	□No
υ.	equal to 9 megagrams/hour (10 tons/hour)?	Yes	□No

1 –NMMP Plant-jaw crusher, 350 T/hr

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or		
	belt conveyor in a production line that processes saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	□No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or		
	which separates marketable fines from the product by a washing process which is designed and operat	ed	
	at all times such that the product is saturated with water. "Saturated material" means mineral materia	il	
	with sufficient surface moisture such that particulate matter emissions are not generated from processi	ng	
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wet	ted	
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line		
	downstream of wet mining operation that process saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	□No
	{Note: Wet mining operation means a mining or dredging operation designed and operated to extract		
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic		
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface		
	moisture such that particulate matter emissions are not generated from processing of the material		
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by		
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
If.	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to		
	bpart 000 so skip the following questions and go directly to Question 24.		
	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
-J	ine distret to die of the six Questions 5 10 doore is 110 then continue to Question 11.		
11	.When was the EU last constructed, modified, or reconstructed?		
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	☐ Yes	□No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13	.Does the EU have a particulate matter capture system (equipment including enclosures,		
	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	☐ Yes	□No
	racous, rans, dumpers, every to supraise and number out particular to a control of the		
<i>If</i>	answer to Question 13 is "No" skip the following questions and go directly to Question 19		
14	.Initial Tests:		
-	a. Was an initial PM stack test performed on the control device within 180 days of		
	initial startup of the EU? N/A	☐ Yes	□ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	☐ Yes	□No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	□No
	d. If yes, was the opacity less than or equal to 7% opacity?	Yes	□No
		_	_
15	. If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
	individually in compliance with emissions limits:		
	a. Was an initial PM stack test performed on each vent control device within 180 days of		
	initial startup of the EU? N/A	☐ Yes	☐ No
	$\{A \text{ "vent" is any opening through which there is mechanically induced air flow for the } $		
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
	one or more affected EUs.}		
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	☐ Yes	□No
	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?		□No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	Yes	□No

1 –NMMP Plant-jaw crusher, 350 T/hr

16. Is a baghouse used to control emissions from the EU?	□ Y	es \square No
If yes, the owner operator: conducts quarterly 30-minute VE tests using Method 22;		
uses a bag leak detection system specified in 40 CFR 60.674(d);		
follows the requirements of 40 CFR 63AAAAA Lime Manufacturir	ıg	
as specified in 40 CFR 60.674(e); or		
none of the above (i.e., out of compliance)		
477 4641 4777 * 1 * 1 * 1 * 1 * 1 * 1 * 1 * 1 * 1		
17. If the EU is an individual, enclosed storage bin controlled by a baghouse,		Zaa □ Na
were initial fugitive emissions less than or equal to 7% opacity? N/A	□ I	es
18. Is a wet scrubber used to control emissions from the EU?		esNo
If yes, does the owner/operator maintain and operate:		
a. a device for the continuous measurement of the pressure loss of the gas stream through the		
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's		
instructions?	□ Y	esNo
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250		
pascals +1 inch water gauge pressure.}		
and		
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the		
device has been calibrated on an annual basis in accordance with manufacturer's instructions?	Y	esNo
{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%		
of design scrubbing liquid flow rate.}		
19 Is wet suppression used to control emissions from the FU?	\square v	es \square No
19. Is wet suppression used to control emissions from the EU?	□ Y	esNo
If yes:	□ Y	esNo
If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to	□ Y	esNo
If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?		es □No
If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to	□ Y	es □No
If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken,		
If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly?		
 If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?

Facility Section (continued)

REASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check ☑ box for each	only one question)
1. Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined		
emissions by: a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur		
(at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? \[\] N/A	☐ Yes	☐ No
If no, where are unconfined emissions occurring?		
b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control	☐ Yes ☐ Yes	☐ No ☐ No
of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? \[\] N/A	☐ Yes	☐ No
e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles? N/A	Yes	☐ No
2. If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	Yes Yes	□ No □No
CONFIRMATION OF GENERAL PERMIT ELIGIBILITY	(check 🗹 box for each o	only one
1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant?		_
b) 25 tons per year or more of any combination of hazardous air pollutants?	- Yes	∐No □No
c) 100 tons per year or more of any other regulated air pollutant?	- Yes	□No
2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) o Rule 62-4.040, F.A.C.)?	or	□No
If YES, what non-exempt units or activities?		
b) any emissions units or activities authorized by another air general permit where such other air gene permit and this general permit specifically allow the use of one another at the same facility?		□No
If YES, what other general permit units or activities?		

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a) 275,000 gallons of diesel fuel?	☐ Yes	No No No No No
GENERAL CONDITIONS 1. Has the owner or operator allowed the circumvention of any air pollution control device, or Allowed the emission of air pollutants without the proper operation of all applicable air	(check ☑ box for each	only one question)
pollution control devices?		□No
a) maintain the authorized facility in good condition? b) ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?		□No □No
3. Has the owner or operator allowed you, as the duly authorized representative of the Department, account to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	ess l	No
RELOCATABLE PLANT 1. The facility: ☐ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (If only stationary, skip the following questions 2 and 3.)	(check ☑ box for each	only one question)
 2. For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900 to the Department or Local Air Program no later than five business days following relocation? 	0(6)]	□No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air ope permit, and the relocatable NMMP plant is not included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose? If YES, what was the purpose? {Note: crushing recycled asphalt pavement (rap) at an asphalt plant is considered routine and s therefore must be authorized in the facility's air construction or operation permit.} b) were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?		□No
If YES, were any periods more than 6 months in any consecutive 12-month period?	- Yes	□No

CHANGES	(check 🗹				
Administrative Changes:	box for each	ch question)			
 Were there any changes in the name, address, or phone numb associated with a change in ownership or with a physical relo operations comprising the facility; or any other similar minor If YES, did the facility provide written notification within 30 	ocation of the facility or any emissions units or administrative change at the facility? Yes	□No □No			
New or Modified Process Equipment or Change in Ownership:					
New or Modified Process Equipment or Change in Ownership: Solution Since the last registration form submittal has there been a) Installation of any new process equipment?
