## NON-METALLIC MINERAL PROCESSING PLANTS

## COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE:	ANNUAL (INS1, INS2)	COMPLAINT/DISCOVER ARMS COMPLAINT NO:	Y (CI)			
AIRS ID#: 7775690 DA	ATE: <u>5/10/2013</u>	ARRIVE: <u>8:48 AM</u>	DEPART: <u>11:06 AM</u>			
FACILITY NAME: CH	EMEX FEC-7775167					
FACILITY LOCATIO	N: 13292 NW 118th Ave					
	MEDLEY 33178-3106					
	<b>ED REPRESENTATIVE:</b> STEP lanchardmachinery.com <b>COD:</b> 8/29/2011 / 8/29/2016 (effective date) (end date)	PHEN SOWARDS* PHONE: Mobile: PHONE: Mobile:	(803)608-6433			
	F٤	acility Section				
PART I: INSPECTION	PART I: <u>INSPECTION</u> <u>COMPLIANCE</u> <u>STATUS</u> (check I only one box)					
IN COMPLIAN	ICE MINOR Non-COMPI	LIANCE SIGNIFICAN	Г Non-COMPLIANCE			

	ART II: <u>ONSITE INTRODUCTORY MEETING</u>	(check 🗹 box for each	2
1.	Name(s) of facility representative(s): <u>DEVON COPPOCK</u>		_
	Brief Notes:		
2.	Is the Authorized Representative still STEPHEN SOWARDS*?	🛛 Yes	□No
3.	If different, did the facility provide an administrative update within 30 days? Is the facility contact still ?	Yes Yes	□No □No
4.	Will facility be conducting VE test(s) during today's inspection?	Yes Yes	⊠No □No

Emissions Unit Section <u>1 –NMMP Plant-inclining screen operation, 300 T/hr</u>

	(check 🗹	only one
	box for each	question)
<u>Is the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processi</u>		
{Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majori is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Grani Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermic (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	ity te, l Gravel; Salt; oride, , Kernite,	
1. Is the EU located at a fixed or portable nonmetallic mineral processing plant		
or hot mix asphalt plant that has an aboveground crusher or grinding mill?		No
2. Is the EU located above ground (i.e., not in an underground mine)?	Yes	No
3. Was the EU constructed, modified, or reconstructed after August 31, 1983?	$\bigvee$ Yes	No
<ul> <li>4. Is the EU one of the following?</li></ul>	⊠ Yes	LNo
5. Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or		
subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process	<b>—</b> •-	<b>—</b>
any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	Yes	No
6. Is the EU located at a fixed sand and gravel plant or crushed stone plant with a capacity less than or equal to 23 measurems/hour (25 tons/hour)?	Yes	
capacity less than or equal to 23 megagrams/hour (25 tons/hour)? 7. Is the EU located at a portable sand and gravel plant or crushed stone plant with a		LNo
capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	Yes	No
8. Is the EU located at a common clay plant or pumice plant with capacity less than or		
equal to 9 megagrams/hour (10 tons/hour)?	Yes	No

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or belt conveyor in a production line that processes saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?		Yes	□No
	<i>{Note: "wet screening operation" means a screening operation which removes unwanted material or</i>		103	
	which separates marketable fines from the product by a washing process which is designed and operate	ьd		
	at all times such that the product is saturated with water. "Saturated material" means mineral material			
	with sufficient surface moisture such that particulate matter emissions are not generated from processi			
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wett			
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}	cu		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line			
_	downstream of wet mining operation that process saturated material up to the first crusher,			
	grinding mill or storage bin in the production line?	$\square$	Yes	No
	<i>{Note: Wet mining operation means a mining or dredging operation designed and operated to extract</i>			
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic			
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface			
	moisture such that particulate matter emissions are not generated from processing of the material			
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by			
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}			
If	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to			
su	bpart OOO so skip the following questions and go directly to Question 24.			
If	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.			
11	When most he FU last constructed medified on reconstructed?			
11	.When was the EU last constructed, modified, or reconstructed?			
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?		Yes	No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20			
13	.Does the EU have a particulate matter capture system (equipment including enclosures,			
10	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	No
	moods, rais, dampers, etc.) to capture and transport particulate matter to a control device?		105	10
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19			
5				
14	. Initial Tests:			
	a. Was an initial PM stack test performed on the control device within 180 days of			
	initial startup of the EU? N/A		Yes	🗌 No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?		Yes	No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	=	Yes	No
	d. If yes, was the opacity less than or equal to 7% opacity?		Yes	No
15	If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not			
	individually in compliance with emissions limits:			
	a. Was an initial PM stack test performed on each vent control device within 180 days of		Vac	
	initial startup of the EU? $\Box$ N/A		Yes	∐ No
	$\{A  "vent" is any opening through which there is mechanically induced air flow for the number of exhausting from a building air commission particulate matter (BM) emissions from$			
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from			
	one or more affected EUs.}		Vac	
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	_	Yes	L.No
l	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?		Yes	L.No
lí	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?		Yes	LNo

16. Is a baghouse used to control emissions from the EU?	Yes	No
If yes, the owner operator:          Conducts quarterly 30-minute VE tests using Method 22;         Uses a bag leak detection system specified in 40 CFR 60.674(d);         follows the requirements of 40 CFR 63AAAAA Lime Manufacturin         as specified in 40 CFR 60.674(e); or         none of the above (i.e., out of compliance)	ng	_
17. If the EU is an individual analoged stars as his controlled by a hachouse		
<b>17.If the EU is an individual, enclosed storage bin controlled by a baghouse,</b> were initial fugitive emissions less than or equal to 7% opacity? N/A	Yes	🗌 No
18. Is a wet scrubber used to control emissions from the EU?	Yes	No
If yes, does the owner/operator maintain and operate:		
<ul> <li>a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?</li></ul>	Yes	No
<ul> <li>and</li> <li>b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions ?         {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.}     </li> </ul>	Yes	No
19. Is wet suppression used to control emissions from the EU?	T Yes	□No
<ul> <li>If yes:</li> <li>a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?</li> <li>b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly?</li> <li>c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?</li></ul>		
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.		
<b>20. Does the EU have a particulate matter</b> <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes	No
<ul> <li>21. Initial Tests:</li> <li>a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU? N/A</li> <li>b. If yes, was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)?</li> <li>c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?</li></ul>	☐ Yes ☐ Yes ☐ Yes ☐ Yes	☐ No ☐No ☐No ☐No

22. If the EU is a building enclosing any other regulated EUs	and all enclosed EUs are not		
individually in compliance with emissions limits:			
a. Was an initial PM stack test performed on each vent contra	ol device within 180 days of		
initial startup of the EU?	N/A	Yes	No No
{A "vent" is any opening through which there is mechanical	ly induced air flow for the		
purpose of exhausting from a building air carrying particula			
one or more affected EUs.}	······································		
b. Was the EU found to be in compliance with the PM limit	of 0.05 g/dscm (0.022 gr/dscf)?	☐ Yes	No
c. Were initial fugitive emissions from non-vent building op		☐ Yes	$\square$ No
e. Were mittar rughtve emissions from non vent ounding op	chings less than of equal to 770 opacity.		
23. Is a wet scrubber used to control emissions from the EU?		T Yes	No
If yes, does the owner/operator maintain and operate:			
a. a device for the continuous measurement of the pressure l	oss of the gas stream through the		
scrubber and the device has been calibrated on an annu			
instructions?		T Yes	No
{Note: The monitoring device must be certified by the			
pascals +1 inch water gauge pressure.}	manufacturer to be accurate within +250		
and			
b. a device for the continuous measurement of the scrubbing	liquid flow rate to the wet scrubber and the	2	
device has been calibrated on an annual basis in accord		Yes	No
{Note: The monitoring device must be certified by the			
	manufacturer to be accurate within +5%		
of design scrubbing liquid flow rate.}			
24. When was the last VE test conducted by the owner/opera	tor for this FU?		
a. If EU is not subject to 40 CFR 60 subpart OOO, has the E		Yes	□No
b. If EU is subject to 40 CFR subpart OOO:	to been tested within the past 5 years?		NO
i. has the EU been tested during each of the past 4 cale	n dan waana?		
		Yes Ves	L.No
ii. has the EU been tested yet within the current calend	ar year?	Yes	No
25. Was a VE test conducted by the <i>owner/operator</i> for this u	nit during this site visit?	Yes	□No
a. Was the VE test conducted by the <i>owner/operator</i> for this d		Tes Yes	$\square$ No
Rate:			NO
b. Was the VE test conducted according to EPA Method 9?		Yes	□No
c. The VE test resulted in an opacity of% for the high			
d. Did the VE test demonstrate compliance with the opacity		Yes	No
a. Did the VE test demonstrate comphanee with the opacity	mint: (See chart below).		
26. Was a VE test conducted by the <i>inspector</i> for this unit du	ring this site visit?	Yes	□No
a. Was the VE test conducted at a process rate that is represe		Yes	No
Rate:			
b. Was the VE test conducted according to EPA Method 9?		T Yes	□No
c. The VE test resulted in an opacity of% for the high			
d. Did the VE test demonstrate compliance with the opacity		Yes	□No
a. Dra me vib lest demonstrate compliance with the opacity	mmt: (See chart below)		
l			
VE Opad	rity Limits		

VE Opacity Limits					
	EU not subject to 40 CFR 60 Subpart OOO	Subpart OOO EU constructed, modified, or reconstructed prior to 4/22/2008	Subpart OOO EU constructed, modified, or reconstructed on or after 4/22/2008		
Crusher with no capture system	20%	15%	12%		
All other affected EUs	20%	10%	7%		

<u>RI</u>	EASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check 🗹 box for each d	only one question)
1.	<ul> <li>Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined emissions by:</li> <li>a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)? N/A</li> </ul>	□ Yes	□ No
	If no, where are unconfined emissions occurring?		
	<ul> <li>b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A</li> <li>c) Paving and maintaining roads and parking areas? N/A</li> <li>d) Removal of particulate matter from roads and other paved areas under control</li> </ul>	☐ Yes ☐ Yes	□ No □ No
	of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of	Yes	🗌 No
	particulate matter from stock piles? N/A	Yes	🗌 No
2.	If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	<ul><li>Yes</li><li>Yes</li></ul>	□ No □No

## **CONFIRMATION OF GENERAL PERMIT ELIGIBILITY** (check $\square$ only one box for each question) 1. Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant? ----- Yes ...No b) 25 tons per year or more of any combination of hazardous air pollutants? ------ 🗍 Yes ...No c) 100 tons per year or more of any other regulated air pollutant? ------ TYes ...No 2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception of units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? ------ Yes ...No If YES, what non-exempt units or activities? b) any emissions units or activities authorized by another air general permit where such other air general permit and this general permit specifically allow the use of one another at the same facility? ----- Yes ...No If YES, what other general permit units or activities?

3.	Is the total combined annual facility-wide fuel usage of all plants less than or equal to:	
	a) 275,000 gallons of diesel fuel? Yes	No
	b) 23,000 gallons of gasoline? Yes	No
	c) 44 million standard cubic feet on natural gas? Yes	No
	d) 1.3 million gallons of propane? Yes	No
	e) or an equivalent prorated amount if multiple fuels are used onsite (use equation below)? Yes	No
(	) gal diesel/yr + ( ) gal gasoline/yr + ( ) MM SCF nat. gas/yr + ( ) MM gal propane/yr $\leq 1.00?$	
27	75,000 gal diesel/yr 23,000 gal gasoline/yr 44 MM SCF nat. gas/yr 1.3 MM gal propane/yr	
4.	Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel consumption	
	for each consecutive 12-period for the past 5 years? Yes	No

6	SENERAL CONDITIONS	(check 🗹	•
1	. Has the owner or operator allowed the circumvention of any air pollution control device, or	box for each	question)
	Allowed the emission of air pollutants without the proper operation of all applicable air		
2	pollution control devices?	- 🗌 Yes	LNo
	a) maintain the authorized facility in good condition?	- 🗌 Yes	No
2	<ul> <li>b) ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?</li> <li>Has the owner or operator allowed you, as the duly authorized representative of the Department, access</li> </ul>		No
5	to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	🗌 Yes	No

	ELOCATABLE PLANT         The facility:       is stationary;         is relocatable; or       consists of both stationary and relocatable         NMMP and/or concrete batching plants.       (If only stationary, skip the following questions 2 and 3.)	(check 🗹 box for each	only one question)
2.	<ul> <li>For a relocated NMMP plant:</li> <li>a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location?</li> <li>b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900( to the Department or Local Air Program no later than five business days following relocation?</li></ul>	6)]	□No □No
3.	If the relocatable NMMP plant was co-located at a facility with a separate air construction or air operate permit, and the relocatable NMMP plant is <u>not</u> included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose? If YES, what was the purpose? {Note: crushing recycled asphalt pavement (rap) at an asphalt plant is considered routine and so therefore must be authorized in the facility's air construction or operation permit.}		□No
	<ul> <li>b) were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?</li></ul>	Yes Yes	□No □No

	CHANGES	(check ☑ box for each	only one question)
1	• Were there any changes in the name, address, or phone number of the facility or authorized represent associated with a change in ownership or with a physical relocation of the facility or any emissions upperations comprising the facility; or any other similar minor administrative change at the facility?	nits <u>or</u>	XNo
2	. If YES, did the facility provide written notification within 30 days of the change?		No
New or Modified Process Equipment or Change in Ownership:			
3	. Since the last registration form submittal has there been		
	a) Installation of any new process equipment?		🖾No
	b) Alterations to existing process equipment without replacement?	🗌 Yes	🖾No
	c) Replacement of existing equipment with equipment that is substantially different?	🗌 Yes	🖾No
	d) A change in ownership?	🗌 Yes	🖾No
4	. If the answer to any question 3a. – d. is YES, was a new registration form and the appropriate fee su	bmitted	
	30 days prior to the change?	Yes	No
