Hi Laura,

Please see attached a letter and the supporting photos. I hope this is what you were looking for please let me know if I need to correct or add anything to the letter. I hope this will satisfy the response to both the departments.

I was working on this today and that's the reason why I was not able to send you the response. Thank you for your patience.

And Thank you for your assistance.

Re : Hazardous waste compliance assistance visit.

Attn : **Laura M. Comer, Environmental Consultant & Dick, Regina**

Corrective actions taken are listed below

Thank you for your recent visit at our Valyou Cleaners located at 4388 Tamiami Trail North, Naples, FL for Hazardous Waste Compliance assistance. We greatly appreciate your input and concerns in keeping our environment clean. Following are the steps we have taken.

1. For the startup/shutdown/malfunction plan we have labeled all the possible emergency shut offs starting with the Emergency Shut off on the Dry cleaning machine, the main electrical cut off switch for the dry cleaning machine and the breaker supplying the power to the dry cleaning machine. We trained all the staff members who are handling this machine how to operate them in case of an emergency and showed them the instructions from the operators Manual provided by the Machine manufacturer. Photos of the labeled switches attached. The Emergency Coordinator is Jim Patel his Cellular phone number : 941 993 4821,
2. Vacuum Waste water is now being collected and treated through the Galaxy waste water treatment until we get the water tested and determine if this vacuum wastewater is hazardous.
3. We have started storing all the chemicals with the hazardous waste into a secondary confinement tray including the spotting chemicals. Please attached photos
4. All the spotting chemicals are properly labeled and are being stored in secondary confinement tray.
5. The Bulbs were newly installed in March 2012 by the contractor before we opened for business and we have got the address and location for disposing of the bulbs through the local waste management company if need arises.
6. We have assigned a separate vacuum cleaner for all the hazardous waste cleaning purposes and it's labeled for Hazardous waste only.
7. The Mop water after cleaning the area around the spotting table and the dry clean machine is being stored in the hazardous waste drum to be picked up by an FDEP authorized vendor.
8. The mop water after cleaning the rest of the store is now being dumped into the city/county sewer system.
9. Due to our low volume of usage we don't anticipate generating more than 100 kg(220 Pounds of Hazardous Waste) in any calendar month.

Page 1 of 2

Please see attached some of the pictures.

We look forward to working with you in keeping our environment clean.

Please feel free to email or contact us for any errors that we may have made in the steps that needs to be taken to be compliant.

I have addressed this letter to both the agencies and I hope I don't have to write two separate responses for both the agencies FDEP.

Thank you again for your visit and assistance.

Sincerely,

Jay Patel
