COMMENTS: The crematorium was installed in February 2013. The first VE test was completed on April 1, 2013 and submitted to DEP on May 2, 2013. Equipment calibration, adjustments, and preventive or corrective maintenance have not been needed due to the recent installation of the unit. Department representatives spoke to Mr. Byrne about documenting and maintaining records and following the manufacture's recommendations. We spoke about an emergency plan being written and kept on site for easy access. Mr. Byrne agreed to write a plan regarding startup, shutdown, and malfunction instructions and keep it near the unit. The facility appears to be in good condition.
