

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

CARR BUILDING, SUITE 115 3800 COMMONWEALTH BLVD TALLAHASSEE, FLORIDA 32399 RICK SCOTT GOVERNOR HERSCHEL T. VINYARD JR. SECRETARY

July 2, 2013

By Electronic Mail, Received Receipt Requested R.Grant@tampabay.rr.com

Richard Grant Powerscreen of Florida, Inc. 5125 Frontage Road Lakeland, Florida 33810

Dear Mr. Grant:

On June 17, 2013, a Department representative with the Air Resource Management Program inspected your facility, ID 7775761, located at 8305 Blountstown Highway, Tallahassee, Florida 32310. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was in compliance at the time of the inspection for those items specifically noted in the inspection report.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact Tracy White at 850.245.2960 or e-mail tracy.a.white@dep.state.fl.us.

Sincerely,

Michael Mathews

Environmental Manager

MM/tw Enclosure

Emissions Unit Section 1 –NMMP - crusher w/3-48'sprbar,38"x3'4"x11'4"conv belt,200T/hr

		(check 🗹	only one
	ł	ox for each	question)
Is	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processin		•
13	{Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majoring is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granite Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	ry e, Gravel; Salt; ride, Kernite,	
1.	Is the EU located at a fixed or portable nonmetallic mineral processing plant		
1.	or hot mix asphalt plant that has an aboveground crusher or grinding mill?	⊠ Yes	□No
2.	Is the EU located above ground (i.e., not in an underground mine)?		□No
	Was the EU constructed, modified, or reconstructed after August 31, 1983?		☐No
4.	Is the EU one of the following?	Yes	□No
	crusher, grinding mill, bucket elevator, belt conveyor, bagging operation,		
	storage bin, enclosed truck loading station enclosed railcar loading station;		
	crusher or grinding mill at hot mix asphalt plant that reduces the size of nonmetallic		
	minerals embedded in recycled asphalt pavement or subsequent emissions unit up to,		
	but not including, the first storage silo or bin;		
	screening operation (a device for separating material according to size by passing undersize material through one or more mesh surfaces (screens) in series, and retaining		
	oversize material on the mesh surfaces. Grizzly feeders associated with truck dumping		
	and static (non-moving) grizzlies used anywhere in the nonmetallic mineral processing		
	plant are not considered to be screening operations.)		
	building enclosing any of the above EUs if all enclosed EUs are not individually in		
	compliance with emissions limits. {A "vent" is any opening through		
	which there is mechanically induced air flow for the purpose of exhausting from a building		
	air carrying particulate matter (PM) emissions from one or more affected EUs.}		
su	answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.		
5.	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or		
	subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process	_	_
		Yes Yes	⊠No
6.	Is the EU located at a fixed sand and gravel plant or crushed stone plant with a		
_	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	☐ Yes	⊠No
/٠	Is the EU located at a portable sand and gravel plant or crushed stone plant with a	□ Vac	⊠ No
Q	capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	Yes	⊠No
σ.	equal to 9 megagrams/hour (10 tons/hour)?	☐ Yes	⊠No

<u>1 –NMMP - crusher w/3-48'sprbar,38"x3'4"x11'4"conv belt,200T/hr</u>

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or		
	belt conveyor in a production line that processes saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	⊠No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or		
	which separates marketable fines from the product by a washing process which is designed and operat	ed	
	at all times such that the product is saturated with water. "Saturated material" means mineral materia	d	
	with sufficient surface moisture such that particulate matter emissions are not generated from processi	ng	
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wet	ted	
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line		
	downstream of wet mining operation that process saturated material up to the first crusher,	_	_
	grinding mill or storage bin in the production line?	Yes	⊠No
	{Note: Wet mining operation means a mining or dredging operation designed and operated to extract		
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic		
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface		
	moisture such that particulate matter emissions are not generated from processing of the material		
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by		
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
	answer to any of the six Questions 5-10 above is "Yes" then the EU is not subject to		
	bpart OOO so skip the following questions and go directly to Question 24.		
I f	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
11	. When was the EU last constructed, modified, or reconstructed? $2/05/2013$		
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	⊠ Yes	□No
I f	answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13	.Does the EU have a particulate matter capture system (equipment including enclosures,		
	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	∐ Yes	⊠No
I f	answer to Question 13 is "No" skip the following questions and go directly to Question 19		
14	.Initial Tests:		
	a. Was an initial PM stack test performed on the control device within 180 days of		
	initial startup of the EU? N/A	∐ Yes	∐ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	Yes	∐No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	∐No
	d. If yes, was the opacity less than or equal to 7% opacity?	∐ Yes	∐No
15	.If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
	individually in compliance with emissions limits:		
	a. Was an initial PM stack test performed on each vent control device within 180 days of		
	initial startup of the EU? N/A	Yes Yes	☐ No
	{A "vent" is any opening through which there is mechanically induced air flow for the		
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
	one or more affected EUs.}		
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	Yes	□No
	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?	Yes	No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	∐ Yes	∐No
i			

<u>1 –NMMP - crusher w/3-48'sprbar,38"x3'4"x11'4"conv belt,200T/hr</u>

16. Is a baghouse used to control emissions from the EU?	Yes	□No
If yes, the owner operator: conducts quarterly 30-minute VE tests using Method 22; uses a bag leak detection system specified in 40 CFR 60.674(d); follows the requirements of 40 CFR 63AAAAA Lime Manufacturin as specified in 40 CFR 60.674(e); or none of the above (i.e., out of compliance)	ng	
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity? N/A	Yes	☐ No
18. Is a wet scrubber used to control emissions from the EU?	Yes	□No
 a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	Yes	□No
 b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.} 		□No
19. Is wet suppression used to control emissions from the EU? If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete	⊠ Yes	□No
corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?	⊠ Yes	□No
questions and go directly to Question 24.		
20. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes	□No
21. Initial Tests: a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	☐ Yes ☐ Yes ☐ Yes ☐ Yes	☐ No ☐No ☐No ☐No

REASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check ☑ box for each	•
1. Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined		
emissions by: a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)?	⊠ Yes	□ No
b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control	Yes Yes	☐ No ☐ No
of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A	Yes	☐ No
e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles? N/A	☐ Yes	□ No
2. If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? N/A b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	Yes Yes	□ No □No
CONFIRMATION OF GENERAL PERMIT ELIGIBILITY 1. Does this facility bear proceeds to about that it does not have the protection to provide the second to be a	(check 🗹 box for each a	only one nuestion)
Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant?	□ ***	□ No
b) 25 tons per year or more of any combination of hazardous air pollutants? c) 100 tons per year or more of any other regulated air pollutant?	- Yes	□No □No □No
b) 25 tons per year or more of any combination of hazardous air pollutants?	Yes Yes Yes	No

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a) 275,000 gallons of diesel fuel?	☐ Yes	□No□No□No□No ?
GENERAL CONDITIONS 1. Has the owner or operator allowed the circumvention of any air pollution control device, or Allowed the emission of air pollutants without the proper operation of all applicable air	(check 🗹 box for each	only one question)
pollution control devices?	Yes	⊠No
a) maintain the authorized facility in good condition?b) ensure that the facility maintains its eligibility to use the air general permit and complies with all		□No
terms and conditions of the air general permit?	ess	□No
to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?		□No
RELOCATABLE PLANT	(d1 17	1
1. The facility: ☐ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (<i>If only stationary, skip the following questions 2 and 3.</i>)	(check b	only one question)
 2. For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900 to the Department or Local Air Program no later than five business days following relocation? - 	(6)]	□No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air oper permit, and the relocatable NMMP plant is not included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose?	Yes	□No
If YES, were any periods more than 6 months in any consecutive 12-month period?	- Yes	∐No

CHANGES	(check ☑ only one			
Administrative Changes:	box for each question)			
 Were there any changes in the name, address, or phone number associated with a change in ownership or with a physical reloca operations comprising the facility; or any other similar minor at If YES, did the facility provide written notification within 30 days. 	ation of the facility or any emissions units or district during the district during the facility? Yes \(\sigma.\).No			
New or Modified Process Equipment or Change in Ownership:				
3. Since the last registration form submittal has there been				
a) Installation of any new process equipment?	Yes 🗵No			
b) Alterations to existing process equipment without replacement	ent?			
c) Replacement of existing equipment with equipment that is s	substantially different?

Inspector's Signature	Approximate Date of Next Inspection			
COMMENTS: I met with Andy Gibbons, Site Manager, Solomor	n C&D. The VE test consultant did not appear to be at the site.			
The equipment was in operation, a rock crusher and separate screener. The equipment was being leased by Solomon, with permits under Powerscreen, Inc. The site had a piped water supply, and a water supply hose (emission control) was connected to the crusher. I observed the crusher being loaded. No excess emission was noted.				
According to Mr. Gibbons, the crusher will be on site for approximately 30 days. Approximately 15 years-worth of accumulated concrete C&D was present and needed to be processed during that time period. According to Mr. Gibbons, the waste was asbestosfree.				
I left the site at approximately 1:30 P.M. The consultant was not provided the site at approximately 1:30 P.M.	resent when I left the site.			
Recommendations:				
I did not witness the scheduled VE testing during this inspection. Please note that VE testing and submittal of test results may be
