COMMENTS: The OCEPD inspector Norma Ali, met with Christopher Brosche, Regional Manager, Gunite and Zachary Beatty from Beatty Environmental Services, LLC to audit the visual emission test on EU001 Cement silo loading. Opacity observed equal to zero percent. About 45 minutes after the tanker started loading up the material, emission were observed coming from the pop-off valve, the manager asked the tanker driver to stop loading and went up to check if the silo was full. He confirmed the silo was full and asked the driver to return the material and weigh how much was left, Chris Brosche will notify the consultant and inspector, to be able to calculate the tons per hour. On December 21, 2013, the consultant's VE report was received and the loading rate provided was 31.5 TPH.
