# ERAL PROCESSING

### COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2)			
AIRS ID#: 7775770 DATE: <u>6/21/2013</u> ARRIVE: <u>1350</u> DEPART:	<u>1515</u>		
FACILITY NAME: JENKINS TRUCKING, INC.			
FACILITY LOCATION: 128 43rd Ave SW			
VERO BEACH 32968-2382			
OWNER/AUTHORIZED REPRESENTATIVE: BRIAN JENKINS Email: Mobile: CONTACT NAME: BRIAN JENKINS Email: verosandman@aol.com ENTITLEMENT PERIOD: 6/17/2013 / 6/17/2018 (effective date) (end date)  PHONE: Mobile: Mobile:	05		
Facility Section  PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box)  ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE			
PART II: ONSITE INTRODUCTORY MEETING	(1.17		
1. Name(s) of facility representative(s):  Brief Notes:	(check ✓ only one box for each question)		
2. Is the Authorized Representative still BRIAN JENKINS?	⊠ Yes □No		
If different, did the facility provide an administrative update within 30 days?  3. Is the facility contact still BRIAN JENKINS?  If no, who is?:	☐ Yes ☐No ☐No		
4. Will facility be conducting VE test(s) during today's inspection?	YesNo YesNo		

### Emissions Unit Section <u>1 - Primary Crusher</u>

		(check <b>☑</b>	only one
	ŀ	ox for each	question)
<u>Is</u>	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processing (Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majorities any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granit Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlos and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	ng Plants? y e, Gravel; Salt; ride, Kernite,	1
2. 3.	Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?		No No No No
su If	air carrying particulate matter (PM) emissions from one or more affected EUs.}  answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.		
	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	☐ Yes	⊠No
7.	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	Yes	⊠No
8.	capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	☐ Yes	⊠No ⊠No

### 1 -Primary Crusher

9. Is the EU a wet screening operation or subsequent screening operation, belt conveyor in a production line that processes saturated material up to grinding mill or storage bin in the production line?	the first crusher,  emoves unwanted material or s which is designed and operated sterial" means mineral material re not generated from processing conveyors. Material that is wette	g	⊠No
10. Is the EU a screening operation, bucket elevator or belt conveyor in the downstream of wet mining operation that process saturated material up a grinding mill or storage bin in the production line?	o the first crusher,igned and operated to extract	☐ Yes	⊠No
any nonmetallic mineral from deposits existing at or below the water tal mineral is saturated with water. "Saturated material" means mineral m moisture such that particulate matter emissions are not generated from through screening operations, bucket elevators and belt conveyors. Man wet suppression systems is not considered to be "saturated" for purpose	aterial with sufficient surface n processing of the material erial that is wetted solely by		
If answer to any of the six Questions 5 -10 above is "Yes" then the EU is subpart OOO so skip the following questions and go directly to Question If the answer to all of the six Questions 5-10 above is "No" then continue	24.		
11. When was the EU last constructed, modified, or reconstructed? $\frac{1/1}{2}$	<u>′02</u>		
12. Was the EU constructed, modified, or reconstructed on or after 4/2.	2/2008?	☐ Yes	⊠No
If answer to Question 12 is "No" skip the following questions and go dire	ctly to Question 20		
<b>13.Does the EU have a particulate matter</b> <i>capture system</i> (equipment inc Hoods, fans, dampers, etc.) to capture and transport particulate ma	_	☐ Yes	⊠No
If answer to Question 13 is "No" skip the following questions and go dire	ctly to Question 19		
a. Was an initial PM stack test performed on the control device within 1 initial startup of the EU?  b. If yes, was the EU found to be in compliance with the PM limit of 0.0 c. Was an initial VE test performed on any fugitive emissions (escaping d. If yes, was the opacity less than or equal to 7% opacity?	32 g/dscm (0.014 gr/dscf)? capture system)?	Yes     Yes     Yes     Yes     Yes     Yes	☐ No ☐No ☐No ☐No
15. If the EU is a building enclosing any other regulated EUs and all encindividually in compliance with emissions limits:  a. Was an initial PM stack test performed on each vent control device w initial startup of the EU?	thin 180 days of	☐ Yes	□ No
one or more affected EUs.] b. If yes, was the EU found to be in compliance with the PM limit of 0.0 c. Was an initial VE test performed on fugitive emissions from non-vent d. Were initial fugitive emissions from non-vent building openings less	building openings?	☐ Yes ☐ Yes ☐ Yes	□No □No □No

### 1 -Primary Crusher

16.Is a baghouse used to control emissions from the EU?		Yes	⊠No
If yes, the owner operator: Conducts quarterly 30-minute VE tests using Method 22;			
uses a bag leak detection system specified in 40 CFR 60.674(d);			
follows the requirements of 40 CFR 63AAAAA Lime Manufacturi	ng		
as specified in 40 CFR 60.674(e); or			
none of the above (i.e., out of compliance)			
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity?   N/A		Yes	☐ No
18. Is a wet scrubber used to control emissions from the EU?		Yes	⊠No
If yes, does the owner/operator maintain and operate:			
a. a device for the continuous measurement of the pressure loss of the gas stream through the			
scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?		Yes	□No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +250	- Ш	1 68	NO
pascals +1 inch water gauge pressure.}			
and			
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the			
device has been calibrated on an annual basis in accordance with manufacturer's instructions?		Yes	□No
{Note: The monitoring device must be certified by the manufacturer to be accurate within +5%			
of design scrubbing liquid flow rate.}			
19. Is wet suppression used to control emissions from the EU?	П	Yes	⊠No
If yes:		105	2(0
a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?			
b. Does the owner/operator initiate corrective action within 24 hours and complete			
corrective action as expediently as practical is water is not flowing properly?			
c. Is each inspection of the spray nozzles, including the date and any corrective action taken,	_		
recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?	Ш	Yes	∐No
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.			
20. Does the EU have a particulate matter capture system (equipment including enclosures,			
Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?		Yes	⊠No
21. Initial Tests:			
a. Was an initial PM stack test performed on the control device within 180 days of		Vac	□ N-
initial startup of the EU?	님	Yes	∐ No
b. If yes, was the EU found to be in compliance with the PM limit of 0.05 g/dscm (0.022 gr/dscf)? c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	님	Yes Yes	∐No □No
d. If yes, was the opacity less than or equal to 7% opacity?	H	Yes	□No
a. If yes, was the opacity less than or equal to 770 opacity.	Ш	105	

### 1 -Primary Crusher

22. If the EU is a building enclosing a		and all enclosed EUs are not		
individually in compliance with en

## Emissions Unit Section <u>2 –Screener</u>

1. 2. 3. 4.	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processing (Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majorities any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granitic Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo, and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Tale and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermic (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}  Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?	y e, Gravel; Salt; ride, Kernite, ulite; Yes Yes	<ul><li>□No</li><li>□No</li><li>□No</li><li>□No</li></ul>
su	answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.		
6. 7.	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	<ul><li>☐ Yes</li><li>☐ Yes</li><li>☐ Yes</li><li>☐ Yes</li></ul>	<ul><li>□No</li><li>□No</li><li>□No</li><li>□No</li></ul>

### 2 -Screener

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or belt conveyor in a production line that processes saturated material up to the first crusher, grinding mill or storage bin in the production line?	l ng	□No
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line downstream of wet mining operation that process saturated material up to the first crusher, grinding mill or storage bin in the production line?	☐ Yes	□No
	(Note: Wet mining operation means a mining or dredging operation designed and operated to extract any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic mineral is saturated with water. "Saturated material" means mineral material with sufficient surface moisture such that particulate matter emissions are not generated from processing of the material through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.)		
su	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
11	When was the EU last constructed, modified, or reconstructed?		
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	☐ Yes	□No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13	Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	☐ Yes	□No
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19		
14	a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	☐ Yes ☐ Yes ☐ Yes ☐ Yes	☐ No ☐No ☐No ☐No
15	If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
	individually in compliance with emissions limits:  a. Was an initial PM stack test performed on each vent control device within 180 days of initial startup of the EU?	☐ Yes	□ No
	one or more affected EUs.} b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)? c. Was an initial VE test performed on fugitive emissions from non-vent building openings? d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	☐ Yes ☐ Yes ☐ Yes	□No □No □No

### 2 -Screener

16. Is a baghouse used to control emissions from the EU?	Yes	□No
If yes, the owner operator:  conducts quarterly 30-minute VE tests using Method 22; uses a bag leak detection system specified in 40 CFR 60.674(d); follows the requirements of 40 CFR 63AAAAA Lime Manufacturin as specified in 40 CFR 60.674(e); or none of the above (i.e., out of compliance)	ng	
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity?   N/A	☐ Yes	☐ No
<b>18. Is a wet scrubber used to control emissions from the EU?</b> If yes, does the owner/operator maintain and operate:	☐ Yes	□No
a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	☐ Yes	□No
<ul> <li>b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.}</li> </ul>		□No
19. Is wet suppression used to control emissions from the EU?	☐ Yes	□No
<ul> <li>a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?</li> <li>b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly?</li> <li>c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?</li></ul>	☐ Yes	□No
questions and go directly to Question 24.		
<b>20. Does the EU have a particulate matter</b> <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes	□No
21. Initial Tests:  a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	Yes Yes Yes Yes	☐ No ☐No ☐No ☐No

### **Facility Section (continued)**

REASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check ☑ box for each	only one question)
1. Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined		
emissions by:  a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)?   If no, where are unconfined emissions occurring?	⊠ Yes	□ No
b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control	⊠ Yes □ Yes	□ No □ No
of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A  e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of	☐ Yes	⊠ No
particulate matter from stock piles? \square N/A	⊠ Yes	☐ No
2. If reasonable precautions <u>not</u> being taken:  a) Did the inspector perform a general VE test (20% opacity)?   b) If tested: ()% opacity. Were the visible emissions < 20% opacity?  c) What caused the problem(s) (if known)?	☐ Yes ☐ Yes	□ No □No
CONFIRMATION OF GENERAL PERMIT ELIGIBILITY  1. Does this facility bean records to show that it does not have the notantial to emit.	(check 🗹 box for each o	only one question)
1. Does this facility keep records to show that it does not have the potential to emit:  a) 10 tons per year or more of any hazardous air pollutant?  b) 25 tons per year or more of any combination of hazardous air pollutants?  c) 100 tons per year or more of any other regulated air pollutant?	- Yes	⊠No ⊠No ⊠No
2. Does this facility include:  a) any emission units or activities not covered by the applicable air general permit (with the exception units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)?  If YES, what non-exempt units or activities?	r	⊠No
b) any emissions units or activities authorized by another air general permit where such other air gene		

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to:  a) 275,000 gallons of diesel fuel?  b) 23,000 gallons of gasoline?  c) 44 million standard cubic feet on natural gas?  d) 1.3 million gallons of propane?  e) or an equivalent prorated amount if multiple fuels are used onsite (use equation below)?  c) gal diesel/yr + ( ) gal gasoline/yr + ( ) MM SCF nat. gas/yr + ( ) MM gal proparation of the past 5 years?  4. Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel consumfor each consecutive 12-period for the past 5 years?		No  No  No  No  No
GENERAL CONDITIONS		
1. Has the owner or operator allowed the circumvention of any air pollution control device, or	(check <b>☑</b> box for each of	only one question)
Allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	Yes	⊠No
2. Does the owner or operator:  a) maintain the authorized facility in good condition?	- 🛚 Yes	□No
b) ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?		□No
3. Has the owner or operator allowed you, as the duly authorized representative of the Department, access to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?		□No
DELOCATA DI E DI ANTI		
<ul> <li>RELOCATABLE PLANT</li> <li>1. The facility: ☐ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (If only stationary, skip the following questions 2 and 3.)</li> </ul>	(check <b>✓</b> box for each of	only one question)
<ul> <li>2. For a relocated NMMP plant:</li> <li>a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location?</li> <li>b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900(6 to the Department or Local Air Program no later than five business days following relocation?</li> </ul>	5)]	⊠No ⊠No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air operate permit, and the relocatable NMMP plant is not included as an emissions unit in that separate permit:  a) was the relocatable NMMP plant being used for a non-routine purpose?		⊠No ⊠No
If YES, were any periods more than 6 months in any consecutive 12-month period?	Yes	□No

Administrative Changes:  1. Were there any changes in the name, address, or phone numbers.	(check 🗹 box for each of the facility or authorized representative not	
associated with a change in ownership or with a physical relocoperations comprising the facility; or any other similar minor  2. If YES, did the facility provide written notification within 30	cation of the facility or any emissions units or administrative change at the facility? Yes	⊠No □No
New or Modified Process Equipment or Change in Ownership:  3. Since the last registration form submittal has there been a) Installation of any new process equipment? b) Alterations to existing process equipment without replacer c) Replacement of existing equipment with equipment that is d) A change in ownership?  4. If the answer to any question 3a. – d. is YES, was a new reging 30 days prior to the change?	nent? Yes substantially different? Yes Yes Yes Yes Yes stration form and the appropriate fee submitted	<ul><li>□No</li><li>□No</li><li>□No</li><li>□No</li></ul>
Geoff Burke and Patricia Tampas	6/21/2013	
Inspector's Name (Please Print)	Date of Inspection	
	6/15/2014	
Inspector's Signature	Approximate Date of Next Inspection	

**COMMENTS:** Initial VE of portable crusher found no violations. Owner was handed a relocation form and instructed to send it to the Department as needed.
