COMMENTS: Inspectors Ilka Bundy and Omar Horta met with Luis Llorens and Luis Delpino of AI Environmental Consulting Services and Fred Springer, owner of West Side Crematory, on January 17, 2014, to audit the visible emission test on the new human cremation unit. This cremation unit, EU001, is a Classic US 100 manufactured by American Incinerators-US Cremation Equipment and is rated at 200 pounds per hour. This compliance test was the facility's initial compliance test for EU001. The cremation unit was installed around 12/4/2013 and was in operation by the middle of December. The unit was tested within 30 days of commencement. The unit was charged with a 150 pound female body. The observed opacity was zero percent. No objectionable odors were detected. Luis Llorens submitted a like-kind compliance test for an identical cremation unit, as requested, to show residence time in the secondary chamber and test results for particulate matter and carbon monoxide emissions. The inspector, Ilka Bundy, checked the cremation unit's thermocouple with the Fluke meter for temperature accuracy. The Fluke meter showed a

temperature of 1670° F and the strip chart and digital recorder showed a temperature of approximately 1674°F. The facility appears to be in compliance with the air general permit at this time.
