**Attachments:** FloridaRockIndustriesIncdbaNewberryAggregatePlant-AGPwithdrawal.pdf

Dear Ms. Veronica Sgro:

Good afternoon and thank you for your letter (see attached .pdf file) written on behalf of your client Florida Rock Industries Inc., dated October 14, 2009, requesting a withdrawal of the Nonmetallic Mineral Processing Plant Air General Permit (AGP) Registration Form dated September 2, 2009 and received September 21, 2009 for the proposed Newberry Aggregate Plant. According to the registration form, the proposed NMMP Plant would be located at the T.S. Baker Cement Plant address given as Cr 235, 2.5 Miles NE of Newberry. The Baker Cement Plant currently holds a Title V air operating (AV) permit as a major source facility.

You may recall during our telephone conversation of September 29, 2009, I had advised that according to the rules (Rule 62-210.310(2)(a), F.A.C., an Air General permitted facility cannot operate under the Air General Permit when collocated with a major source permitted facility. In this particular case the Nonmetallic Mineral Processing Plant must be included as a part of and operated under the major source facility' permit. At that time I had indicated to you that it might be advisable to withdraw the registration rather than proceed through the denial process.

The purpose of this e-mail is confirmation to you that the subject item facility AGP registration form has been withdrawn and no AGP entitlement to operate has been issued.

If you have any questions, comments or concerns please e-mail or call.

Thank you and have a great day!

Sincerely,

*Dickson E. Dibble*
