Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

Construct and operate a proposed new facility.

Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

Continue operating the facility after expiration of the current term of air general permit use.

Continue operating the facility after a change of ownership.

Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____

No air operation permits currently exist for this facility.

Dear Mr. Dobbins,

Thank you so much for your assistance in gathering the information needed in order to accommodate the review and entitlement to operate process.

I apologize for the inconvenience, but I need further clarification regarding the silos and their respective emission control units.

Specifically, the history in our Air Resource database for your facility currently indicates the following:

“2 white west cement silos & 2 gray east cement silos w/baghouses”

I would like to be able to identify each of the six (6) silo units individually along with the appropriate emission control unit serving each silo, so that when and if a site visit is made by an inspector or VE's are conducted, we can identify the associated units and record the data accordingly.

- 1) Would you be so kind and provide an identification “tag” that Paver City uses, or an inspector might use, to identify each silo unit and their respective emission control units (baghouses), if and when a site visit is made?

**(Example: silo #1 – 100T west/white w/Standley Batch System – Model 252R baghouse
silo #2 – 100T west/gray w/Standley Batch System – Model 250SQ baghouse
silo #3 – 100T west/gray w/Standley Batch System – Model 250SQ baghouse
silo #4 - etc., etc.,)**

This data is also used for tracking future replacement or upgrades to equipment, or in the event a unit is taken out of service, it can be inactivated.

Thank you once again for any assistance that you can provide.

Have a great day!

Sincerely yours,

Dickson E. Dibble
