Material Usage Rates

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

If this is a **re-registration** for an existing surface coating operation, provide the highest monthly average of the daily quantity of volatile organic compounds in all coatings (solvents and thinners) used in the last five years. Indicate the month and year during which this usage occurred.

2.85 lbs/day November 2010

Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Painting and priming of both commercial and government and avionic parts. All painting and mixing of paint is done in prefabricated paint booths and exhaust systems discharging on the roof of the facility. There are 3 paint booths located in a 105,000 sf building. Paint booths #1 and 2 are located near each other in the South West quadrant of the building. Paint Booth 2 is the largest of the booths at approximately 35'x10' Paint booth 1 is approximately 30'x15'. Paint booth #3 is located in the North West quadrant and is approximately 25'x10' and is used primarily for primers.
