### Material Usage Rates Initial Registration

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

### Material Usage Rates Re-registration\*

If this is a **re-registration** please provide the following information:

- 1)** In the last five (5) years, what were the **month** and the **year** in which highest monthly usage of volatile organic compounds (VOC) containing materials occurred at your facility?

Month JANUARY Year 2006

- 2)** For that **highest month**, calculate the monthly average of the VOC's in all materials (coatings, thinners & solvents), expressed in pounds (lbs.), using the following equation.

Equation:  $(xxx \text{ lbs VOC/mo} \div 30 \text{ days/mo}) = \text{average VOC lbs/day}$

$$751 \text{ VOC lbs/mo} \div 30 \text{ days/mo} = 25.03 \text{ VOC lbs/day}$$

**\*Note:** The Surface Coating Operations Air General Permit Registration limits the monthly average of VOC's in all materials not to exceed forty-four (44) pounds per day averaged monthly.

### Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.
